## | EXECUTIVE SUMMARY |

In the pages that follow, we describe the students, funding, and performance of the traditional public school (TPS) districts and public charter schools in the greater Kansas City region for the 2017-2018 school year. Students who live within the Kansas City Public Schools boundary are eligible either to attend a KCPS school or to apply to and enroll in one of the city's twenty public charter districts. Charter schools range in size from 114 students at **Hope Leadership Academy** to 1,632 in the **Frontier Schools**. TPS districts range in size from 537 students in **Archie R-V** to 20,340 students in **North Kansas City Schools**.

**Who are Kansas City's students?** Compared to the state, the Kansas City region serves a more racially diverse student body, and has a smaller population of Free/Reduced-Price Lunch (FRL) eligible students. Within the region, **Smithville R-II** serves the smallest population of FRL-eligible students, at 15% of its students. Both **KCPS** and **Hickman Mills C-1** participate in the Community Eligibility Provision. Thus, these districts are shown to have 100% of students as FRL-eligible.

**How much do Kansas City districts spend?** Districts in the region spend just over \$100 less per student than the state average. Expenditures range from \$8,763 per student in **Pleasant Hill** to \$15,405 in **West Platte**. For charter schools, this per pupil amount ranges from \$9,899 at **Académie Lafayette** to \$27,481 at **DeLaSalle Charter School**. Schools and districts receive money from three sources: local taxes, state funds, and federal dollars. On average, Missouri's funds are split 47% local, 43% state, and 10% federal, but this varies across the region and the state given that local funding impacts the amount of state aid a district or charter school receives. Districts in the greater Kansas City region generate a higher fraction of their revenue locally, with 56% of dollars coming from the local tax base. These local amounts range from 86% in **West Platte** to 25% in **Knob Noster**, making Knob Noster the most state-dependent of the region's districts.

**How much do Kansas City teachers make?** The largest portion of a district's or charter school's budget is the salary and benefits paid to teachers and administrators. Here, we see rather large differences in the starting, average, and maximum salaries teachers can earn. **West Platte** has the highest starting salary for teachers in the region, as new teachers start at \$40,000 per year. The district with the lowest starting salary is **Lexington R-V**, at \$31,000, which also has the lowest average salary for teachers at \$41,756. The district with the highest average salary in the region is **Lee's Summit R-7**, which paid its teachers an average of \$61,380 during the 2017-2018 school year. We find the largest disparity in teacher salaries between the maximum salaries teachers can earn. **Adrian R-III**'s highest salary is \$53,100, whereas **Lee's Summit R-7** teachers can earn \$87,444 with appropriate credentials and enough years of experience.

## | HIGHLIGHTS OF THE REGION |

For charter schools, starting salaries range from \$29,000 at **Lee A. Tolbert Community Academy** to \$47,500 at **Frontier Schools**. **DeLaSalle Charter School** pays the lowest average salary (\$38,863) and lowest maximum salary (\$44,055) among charter schools in Kansas City. **Académie Lafayette** offers the highest average salary among charter schools at \$51,779, while **Allen Village** pays the highest maximum salary at \$78,005.

**How are Kansas City students doing?** To measure school performance, we present multiple dimensions including percent of students scoring proficient and advanced on the state's MAP assessment, average ACT Composite score, and graduation rate. The average graduation rate is 89% for the state and 91% for the region.

Both **Lone Jack C-6** and **Mid-Buchanan** have a 100% high school graduation rate, which leads the region. The lowest high school graduation rate is 71% in **KCPS**. **Hickman Mills C-1** has the lowest reported average ACT Composite score at 15.4 out of 36 possible points. **Park Hill** has the highest average ACT score at 22.1.

Data on ACT scores and graduation rates are only reportable for six of the charter districts in the region: **Allen Village**, **DeLaSalle**, **Frontier**, **Guadalupe Centers**, **Hogan Prep**, and **University Academy**, as these charter schools are the only schools serving grade levels that are considered in ACT scores and graduation rates. For eligible charter schools, the ACT scores range from 13.1 at **DeLaSalle** to 21.1 at **University Academy**. Graduation rates range from 35% to 100% in the charter districts in Kansas City.

Missouri has undergone multiple standards and testing changes over the last decade but has finally settled on a re-designed version of the MAP assessment that is based on state-designed learning standards. The first iteration of the new test was administered in the 2017-2018 school year. The percentage of students in the Kansas City network scoring proficient and advanced on the English (51%) and Math (44%) assessments is slightly above the statewide averages (49% and 43%, respectively). However, these simple percentages make it difficult to determine the year-to-year gains in each of these districts and across the

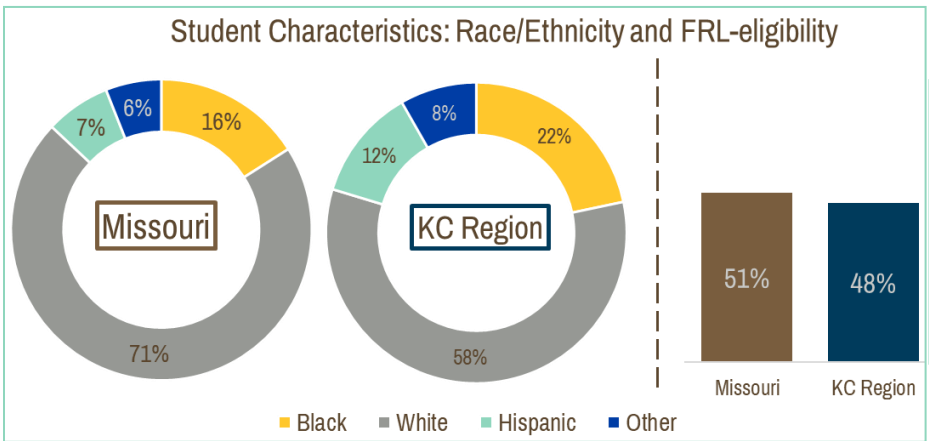

state. Unfortunately, results from the new tests are not directly comparable to the previous years' data, but we look forward to being able to make these comparisons again with results from the 2018-2019 school year.

Preliminary descriptive analyses of these publicly-available test score achievement data show predictable patterns in district performance. Unsurprisingly, we see a strong negative relationship between district performance and the number of FRL-eligible students enrolling. This negative relationship between student performance and student need is similar when examining average ACT scores and high school graduation rates.

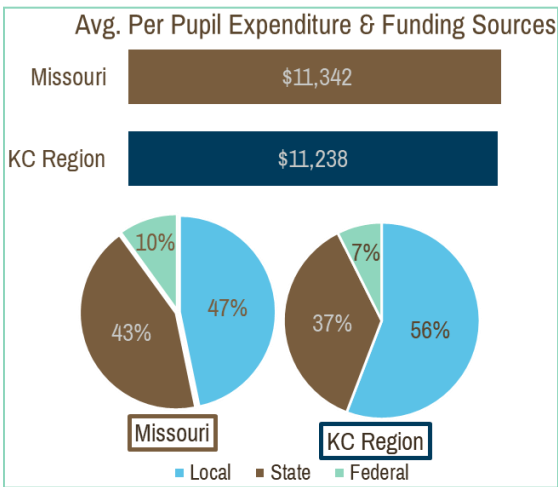

Another district characteristic having a negative impact on school performance is student mobility rate, defined as the percentage of students who change schools during the year. Districts with higher mobility rates routinely have lower percentages of students who score proficient or advanced on both the English and Math MAP assessments, have lower average ACT scores, and have lower high school graduation rates. The connection is strongest between high mobility rates and low graduation rates, showing the importance of stability and consistency in *where* students learn helps students *to learn*.

It is important to note that this publication has only scratched the surface of the education landscape in the greater Kansas City region. These districts charter schools are extremely diverse and spread across a large area of the state. Along with that, we have provided a view of only *district characteristics* using publicly available data, which tells a part of the story. It is likely true we would uncover even more interesting patterns and information for schools both within and across the districts. Along with being accessible on the Department of Elementary and Secondary Education's data portal, we have made these data available on our website ([sluprime.org](http://sluprime.org)). We hope these profiles and datasets provide some useful information about education in the greater Kansas City region and inform the conversation to ensure each district is able to help all students realize their full potential.

# | WHAT THE NUMBERS MEAN |

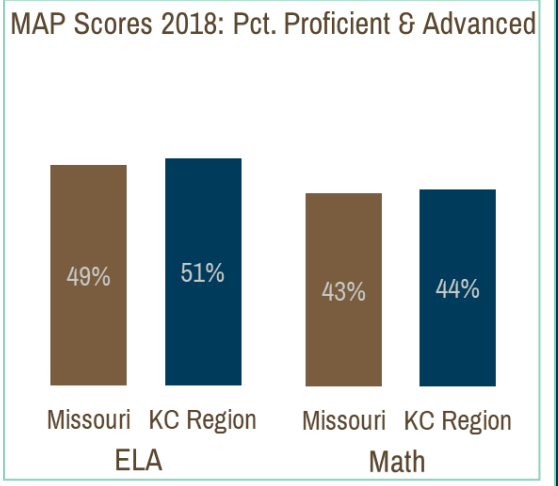

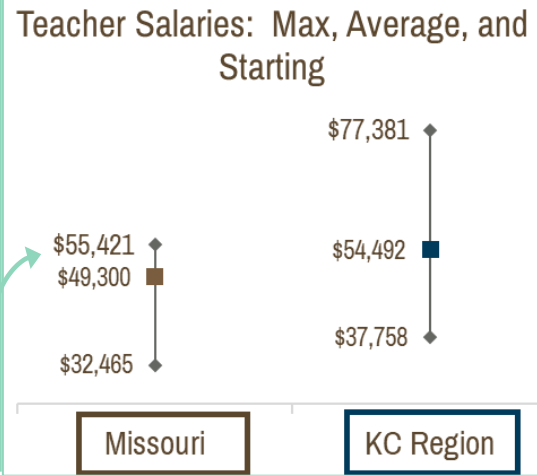

Student Characteristics: Students participating in the Free/Reduced-Price Lunch (FRL) program are often at risk of not meeting proficiency targets on standardized tests or graduating. When considering district performance, it is important to consider the population of students being served.

Expenditures & funding sources showing districts' use of revenues on students and how much local, state, and federal support they receive.

Teacher salary ranges: the average starting and average maximum salary listed on districts salary schedules and the average teacher salary reported to DESE.

Pct. Proficient and Advanced: portion of students testing at the readiness level in English (ELA) and Math. Results are highly related to student characteristics.

Attendance Rate: the number of students who enrolled full time and attended 90% of school days.

Mobility Rate: the number of students who changed schools mid-year divided by total enrollment.

Graduation rate: percent of students who graduate within 4 years of enrolling as freshman.

# PUBLIC CHARTER SCHOOLS OF KANSAS CITY

Charter Schools are independent public schools that are free from some rules and regulations that apply to traditional public school districts as specifically identified in charter school law. In exchange for flexibility, charter school sponsors must hold the schools accountable for results. Charter schools are non-sectarian, do not discriminate in their admission policies and may not charge tuition or fees.

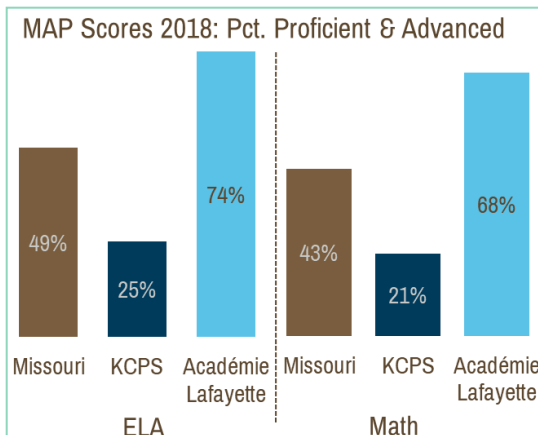

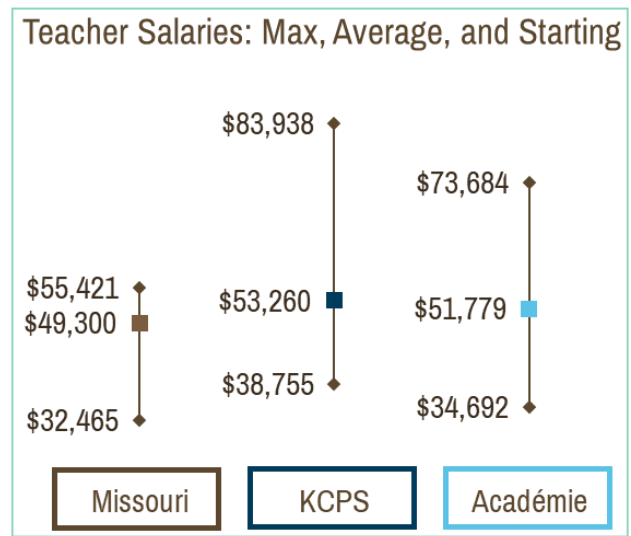

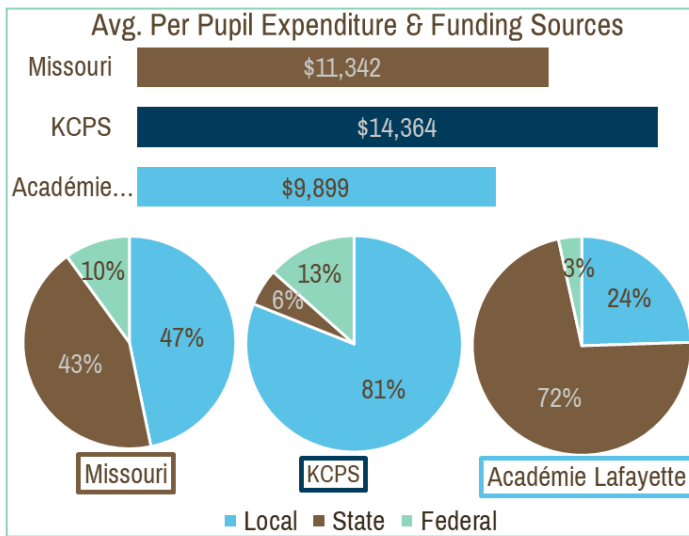

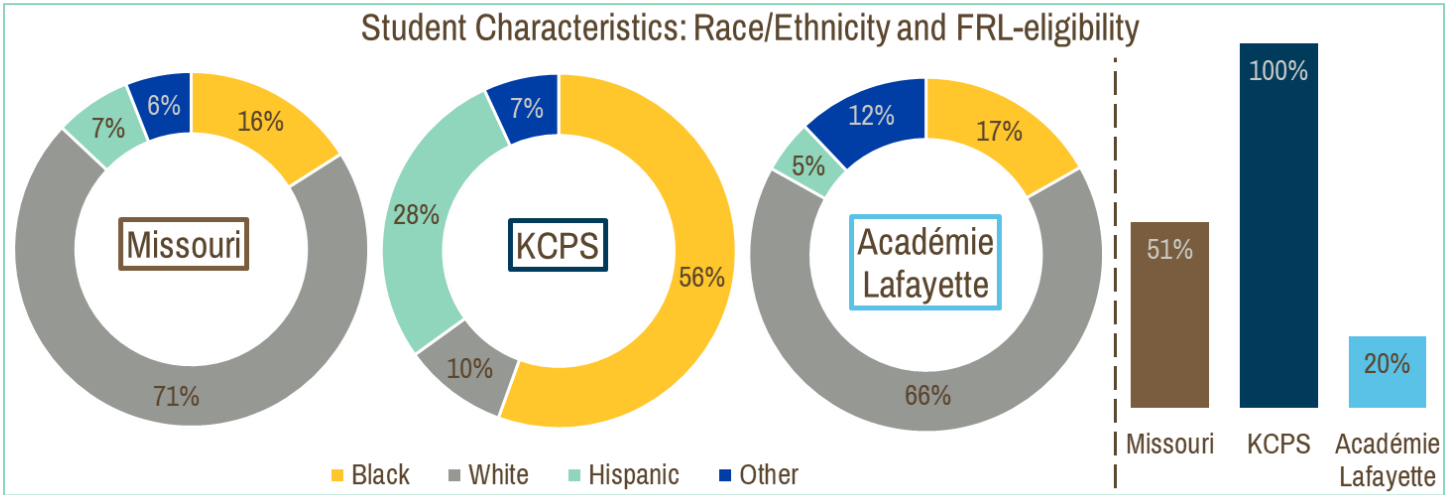

Any student residing in the Kansas City Public School district may choose to attend a charter school. There is no cost to parents for sending their children to a charter school. Any student residing in an unaccredited school district may transfer to an approved charter school in the same or an adjoining county.

**Mission Statement:** To educate the children of Kansas City to become globally minded, locally active critical thinkers through immersion in world languages and cultures.

**Enrollment:** 970 » 2 Schools » Grades K-9 » Sponsor: University of Central Missouri-Warrensburg

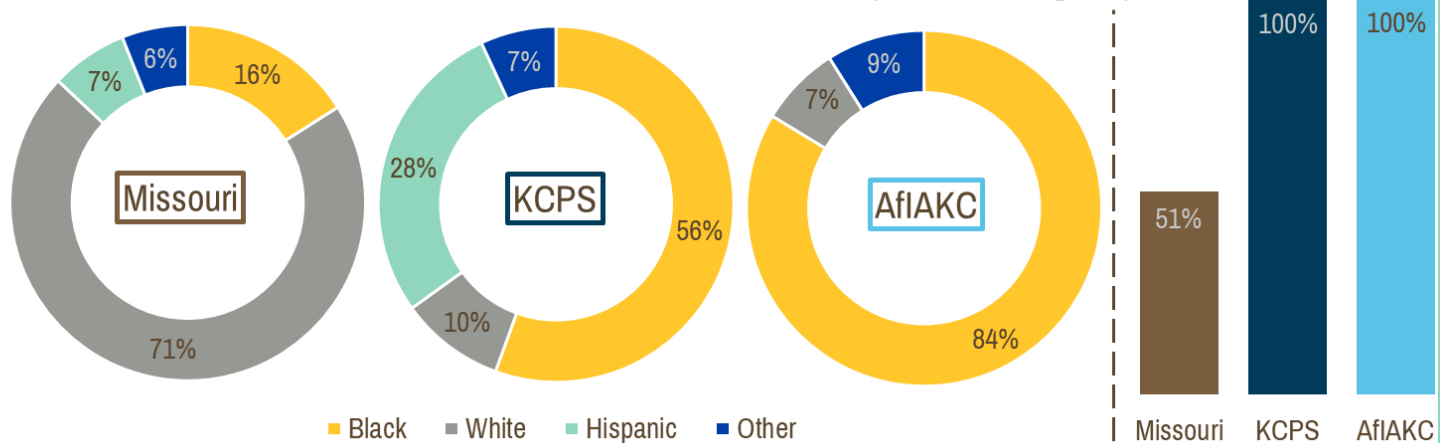

### Additional District Information

ACT Participation Rate	92%	83%	*
ACT Composite Score	19.9	16.2	*

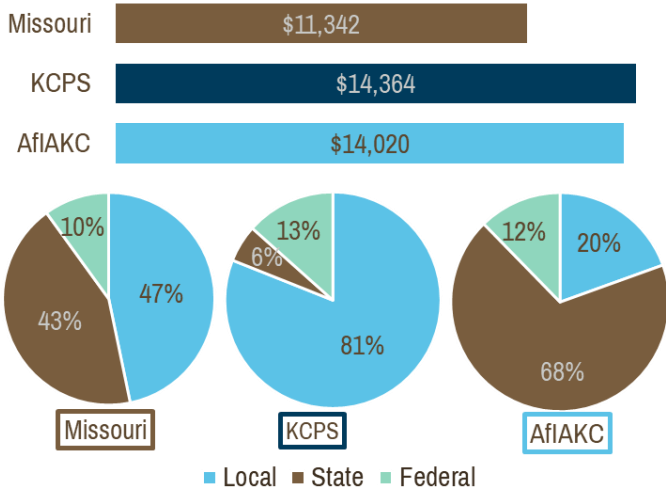

**Mission Statement:** The mission of the Academy for Integrated Arts is to use the arts to prepare students for an admissions-based college preparatory secondary school. The arts will serve as a catalyst for learning, achievement, curiosity and self-esteem. Students will be able to create and actively express a deeper meaning of subject matter content through using visual arts as well as music, dance and dramatization.
