Source: CDC. COVID-19 Community Levels were calculated on March 24, 2022
Number of COVID positive patients in Region 6 hospitals

- 98 confirmed
- 15 in ICU
- 9 on ventilators

% of hospitalized patients who are COVID positive (7 day moving average)

% of COVID positive patients in ICU (7 day moving average)

Positive patients on ventilators as % of positive patients in ICU (7 day moving average)

Source: Ohio Hospital Association Hospital Resource Tracker on March 25th
Trends in the number of patients positive for COVID-19 in Southwestern Ohio hospitals

Given the trend we expect daily values in this shaded range. When a change is signaled the trend is recalculated.

Dashed line indicates a temporary centerline that will change over time. Source: Ohio Hospital Association Hospital Resource Tracker on March 25th.
Percentage of adult beds occupied in the Greater Cincinnati Area

Upper limit reflects currently staffable beds in the area including those beyond the region's normal capacity

ICU beds

Medical-Surgical beds

Seven day sum of new Covid cases per 100,000 people in each county with CDC Level of Transmission

Colors indicate CDC Level of Transmission: Low (0-9.99); Moderate (10.00-49.99); Substantial (50.00-99.99); and High (greater than or equal to 100.00). The Community Level indicator from the CDC uses the cutoff of 200 cases per 100k over 7 days to divide transmission levels.

CDC suppresses reporting of this number when the daily number of reported cases is less than 10 per 100k.

Seven day sum of new Covid-19 cases by onset date per 100,000 by age group in Southwestern Ohio
Label indicates highest seven day moving average in the last two weeks, preliminary data should be considered a floor for the eventual case count

There have been 4,927 deaths due to COVID-19 in Southwestern Ohio

Seven day moving average of COVID-19 deaths. Reports of deaths tend to lag 1-2 months
Percentage of test results returned positive in 14 county region

71% 63% 29%

Source: CDC County data. https://covid.cdc.gov/covid-data-tracker/#county-view. Data as of March 24, 2022. On October 28th duplicate vaccinations were removed from the Kentucky data by the CDC causing a decrease in the rate. Large one day increases are likely due to updates and corrections to the data and not to an increase in vaccines given on that day.
Percentage of the total population with vaccines **started**, **completed**, and with **booster**

- **Southern Ohio, Population: 1,797,896**
  - Started: 1,139,959
  - Completed: 1,057,852
  - Booster: 518,064

- **Northern Kentucky, Population: 419,232**
  - Started: 291,403
  - Completed: 254,502
  - Booster: 112,762

- **Southeastern Indiana, Population: 100,540**
  - Started: 59,260
  - Completed: 52,414
  - Booster: 21,546

- **Total Region, Population: 2,317,668**
  - Started: 1,490,622
  - Completed: 1,364,768
  - Booster: 652,372
