**Functional Genetic
Certification Course**

WE ARE YOUR GENOMIC RESOURCE FOR EVERYTHING PERTAINING TO NUTRIGENOMIC ANALYSIS.

Starting with a custom DNA test kit paired with our proprietary online interpretation software and advanced education courses, practitioners around the world are now better equipped to investigate and analyze influential genes and pathway functions. This critical insight enables you to translate the science of genomics into personalized functional nutrition that addresses impaired pathways for optimal patient/client results.

Take your practice to a whole new level. Join the thousands of health care professionals already optimizing their practice using the most comprehensive clinical support tools from Your Genomic Resource™.

YOUR GENOMIC RESOURCE™ DNA SALIVA TEST KIT PERSONAL. PRACTICAL. PRIVATE DNA KIT.

Created specifically for practitioner use only, Your Genomic Resource has customized a DNA kit that now provides 200,000 SNPs. This raw data looks at various pathways involved in functional nutritional support and helps to tell a more comprehensive story of gene function. Our goal in building this completely custom array was to ensure control of the content, as well as provide a safeguard so that the content would never expire, like previously used tests.

While this DNA test kit cannot be used to diagnose disease, our Functional Genomic Analysis™ software allows you to analyze the raw data, assess disturbances in body function, and design supportive protocols.

- Our customized chip is manufactured by Thermo Fisher and is the most comprehensive chip for genetic nutritional and pathway analysis for the functional medicine/nutrition practitioner.
- The kits/saliva samples are processed through Rutgers University RUCDR Infinite Biologics.
- The kits are available for purchase by practitioners only.
- Our ordering page allows you to have the kits either sent to your office or directly to your patient/client.
- Each kit costs \$199 and includes all the reports.

To explore in-depth genomics for the 21st century, visit www.YourGenomicResource.com or www.FunctionalGenomicAnalysis.com to order saliva test kits for use in your practice.

THE MOST DYNAMIC ONLINE GENETIC INTERPRETATION SOFTWARE

ASSESS, ANALYZE & DESIGN SUPPORT™

Exclusively for health care practitioners, Functional Genomic Analysis™ is a proprietary, cloud-based software that maintains unprecedented analytical capabilities using genomic raw data.

Designed and routinely updated by an expert team of researchers and practitioners, the software's analysis process is based on our custom Pyramid approach, which has received rave reviews from functional medical doctors. The software integrates genetic raw data, lab work results and patient symptoms side-by-side in one program. Once the software runs its complex sequence of mathematical algorithms, it automatically generates detailed reports with dynamic information.

- Gene Report – the number of SNPs/variants
- Patient/Client SNP report
- Practitioner SNP report
- Supplement report – highlights estimated needed nutritional support based on the patient's SNPs, labs and symptom surveys, with warnings for contraindications
- Pyramid report – summarizes all the SNPs, labs and symptoms to make the most effective clinical decision

The software provides a wealth of information as to how our patients' bodies make and use proteins and enzymes that are critical components to rebuild and repair cells, produces antioxidants, and the ability to detoxify. We now have the ability to take proactive, rather than reactive action in supporting our patients' health.

Health professionals all across the country agree this program is the leading software for functional genetic nutrition analysis, as it combines genetic raw data, a symptom survey, and labs to help you decide if SNPs are being expressed.

COMPLIMENTARY TRIAL

A complimentary, no-obligation trial of the Functional Genomic Analysis™ software is available only to practitioners to test this program's superior functionality. Upload one existing raw genetic file for free (Your Genomic Resource™ file or a 23andMe® file, v3, 4, or 5).

Follow these step-by-step instructions to request and set-up an account to run your one free report.

- Use Google Chrome as your internet browser for optimal functionality.
- Visit our website at www.dnasupplementation.com and click "Request Account."
- Fill out the application form with all the necessary information and click "Submit" (the email you enter will be used as your Username upon sign-in).
- Once your account has been approved you will receive an email* with a link to Confirm Your Account. **Make sure to also check your spam folder for this email*
- Click 'Confirm Your Account' to complete setup.
- From there, fill out all the necessary information on the screen and click "Next Step." Passwords must be complex and consist of a capital letter, a lowercase letter, a symbol (a period does not count), and numbers (e.g. MGAmh&1234).
- Confirm Your Details, please ensure that all your information is entered in correctly and click "Finish."

You will then be taken to your portal page where you may add a patient and upload patient raw data from Your Genomic Resource or 23andMe®.

23andMe® is the registered trademark of 23andMe®, Inc. Your Genomic Resource™, Functional Genomic Analysis™ and NutriGenetic Research Institute are not affiliated with 23andMe®.

ONLINE FUNCTIONAL GENETIC CERTIFICATION COURSE

As we enter the era of functional medicine, health care is entering a new paradigm—one where practitioners will look at a combination of labs, presenting symptoms, and genetics to personalize genetic nutritional support for patients. However, without proper tools and education the world of nutritional genetics can be complex. Trying to learn how genetic variants (SNPs) may impact health, comparing them to labs to see if the SNPs are being expressed, learning the correct order to support them, and selecting the right products may seem complex and intimidating.

Fortunately, NutriGenetic Research Institute offers an online certification course in addition to its already established live classes and webinars to educate practitioners about the fundamentals of genetic nutrition. To be successful in this field, practitioners need to be committed to learning, apply analytical thinking, and participate in continuing education to hone their skills. There is a high demand from the public as they seek to understand their genetic make-up, and adding genetic nutrition to your practice can be rewarding and exciting.

This online course is designed to give you the information you need to begin your journey to become a functional genetic nutrition consultant.

COMPREHENSIVE ONLINE CERTIFICATION COURSE

You can now learn at your own pace with our comprehensive online certification course, which takes complex subjects like functional genetic nutrition and helps you to learn it step-by-step.

Our training utilizes a “Pyramid Approach” to genetic nutrition that teaches not only metabolic function and the process to support it, but most importantly orients you to the recommended sequence to achieve optimal long-lasting positive results. Novices to genetic nutrition often give methyl B-12 and methylfolate too soon with very poor results. With the “Pyramid Approach,” you will learn how to support inflammation, imbalance of mTOR and autophagy, excess glutamate, mast cells or many other factors before suggesting methylation support.

The online certification course consists of 14 modules, each containing videos, and modules 1-9 contain a multiple-choice test at the end. When you have passed all the modules and submitted two case studies, you will receive a “Certification of Completion” for this genetic nutritional course. *PLEASE NOTE: your certification has no CEU's attached and has no medical benefit other than showing you took and completed a certification course in nutritional genetics.*

GET THE FIRST THREE TRAINING MODULES FOR FREE!

Our goal is to educate practitioners around the country about the ins-and-outs of functional genomic nutrition to help their patients and clients like never before. Right now, we're offering the first three modules of our online certification course at no charge and no further obligation if you decide it's not for you. Simply visit www.FunctionalGenomicAnalysis.com and click the link to register for the online course, and you will be given access to the first three modules. After you listen to these first modules, you will understand how this will work for you. If, after completing these you decide that this program is not for you, you can end your training with no obligation and at no charge. If you choose to complete the course, we offer the balance of the educational modules for just \$495.

ONLINE FUNCTIONAL GENETIC CERTIFICATION COURSE*

Module # 1 – The Basics: Fundamental Principles, Enzymes, DNA, Genetic Testing, Urine Organic Acid Testing, Comparing SNPs to Labs and Symptoms and an Introduction to the Software

Module # 2 – Gut/Digestion, Food Sensitivities, Gluten, Histamine, Dairy, FUT2, ABP1, HNMT, Zonulin, Gentle Detox/Getting Started

Module # 3 – Free Radicals, Antioxidants, Glutathione, SOD, Catalase, Nrf2, PON1, NOS Uncoupling, Iron Oxidation and Excess Glutamate

Module # 4 – Digestion of Fats, Carbs, and Proteins, Mitochondrial Function, Ammonia, Methionine and Transsulfuration Cycle, Sulfites, Sulfates

Module # 5 – Neurotransmitter Basics, Measuring Neurotransmitters, BH4, Supporting Healthy Neurotransmitters

Module # 6 – Nitric Oxide, Circulation

Module # 7 – Vitamin A & D, ATM, CYP/NRF2, Herbicide/Pesticide, PON1, Electrical Sensitivity

Module # 8 – Methylation-Under/Over, Prepare & Support, B12, Folate

Module # 9 – mTOR and Autophagy

Module # 10 – Pyramid Practicum Part 1

Module # 11 – Pyramid Practicum Part 2

Module # 12 – Pyramid Practicum Part 3

Module # 13 – Pyramid Practicum Part 4

Module # 14 – Pyramid Practicum Part 5

*Modules are continuously being updated, content may appear differently than listed.

TESTIMONIALS

“Bob Miller and his team are to be congratulated for the introduction of the Functional Genomic Nutrition™ application. The introduction of many new metabolic enzyme SNPs has made it difficult for a clinician to develop a workable strategy for intervention. Bob Miller’s app makes a complex exercise much more manageable and logical. This has really helped me to develop and implement a plan of action to help my patients’ navigate the metabolic “potholes” associated with their genetic variants contributing to disease. Thank you for this valuable contribution to nutrigenomic patient care!”

~ Wally Taylor, MD

“I cannot imagine being without this software. Since studying with Bob Miller and using this software, my new nutrition practice has boomed! People love this information and they sign-up without hesitation. I cannot even begin to tell you how deeply this information has helped so many of our patients. I am eagerly looking forward to the next seminar.”

~ Tamara G. Santa Ana, DC

THE FUTURE OF INDIVIDUALIZED HEALTH CARE IS NOW!

Your Genomic Resource provides you with all the tools necessary to utilize functional nutrition genomics in your practice....

- A custom DNA test kit that provides 200,000 SNPs.
- Proprietary interpretation software that combines genetics, labs and symptom survey to make genomics easier to understand, providing an array of reports for supporting your clinical decision making.
- In-depth educational courses, both live and online (so you can learn at your own pace), to deepen your knowledge of genomic nutrition to apply in your everyday practice.

Join the cutting edge of genomic nutrition. Contact our support team today to get started, take us up on our complimentary software trial offer, or download the first three training modules for free to test drive our dynamic and synergistic program.
