

Application

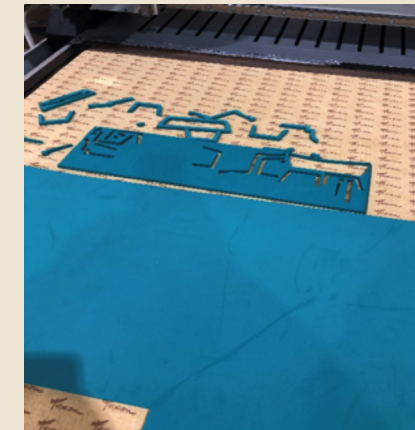

Oscillating Knife Machines (RUBBER CUTTING) and Sample Making Tables (CAD CUTTING/ DRAWING TABLES)

C&T Matrix is pleased to offer a FIBROUS CUTTING TABLE MAT which is BEIGE/FLESH in colour. It is flat, hard wearing, easy to use and offered at an attractive price. The FIBROUS TABLE MAT allows the full vacuum system to pass through it, whilst securely holding down the substrate being worked upon. On oscillating knife machines, the FIBROUS CUTTING TABLE MAT allows for the sharp cutting blade to penetrate its surface without damaging the blade, whilst maintaining optimum machine performance and mechanical integrity of the cutting mat.

When working on sample making tables, the FIBROUS CUTTING TABLE MAT provides a flat and stable surface area to work upon, when drawing out on DRAFTING FILM or PATCH UP PAPERS. Again, the mat will allow for the machines vacuum system to be pulled through it, ensuring that the material is securely held in place for dimensional accuracy.

The FIBROUS CUTTING TABLE MAT can be cut down to size easily with either a knife or scissors to fit the machine table bed. They can also be joined together with tape to cover larger areas required for bigger tables.

The FIBROUS CUTTING TABLE MATS can be quickly rotated and flipped over to maximise their performance for use over a longer period.

Features and benefits

- Flat and hard wearing
- Fibrous structure allows full vacuum to be pulled through it
- Quality Product
- Low cost
- Easy to cut to size or tape together
- Suit any machine size
- Easy to rotate and flip for maximising production life
- Stock item

Product size

1500mm x 1000mm x 2.5mm

Order code: YFTM150X100X2.5
