

## Emergency Assembly Points (EAPs)

An Emergency Assembly Point is a well-developed and well-known FEMA (Federal Emergency Response Agency) disaster management tool for communities and neighborhoods.

Much like a designated assembly area at a school where children gather outside during a fire drill or emergency, EAP's do essentially the same for Atherton residents. EAP's provide a convenient avenue to facilitate neighbors helping neighbors in a major emergency.

Residents should go to their Emergency Assembly Point in an emergency, after making sure that their household members are safe and secure. An instruction card on the back of each EAP sign provides reminders on how to assess damage and assist neighbors. (View the EAP Response Checklist at <https://www.getreadyatherton.org/eap-response-checklist>.)

Atherton's EAP locations are designated by a special sign as seen below.

Please see the following page for a complete list of Atherton EAP locations.

If you have any questions about EAPs or any other emergency preparedness topic, please contact A.D.A.P.T. or your Area Coordinator.
