"AirSep For A Cleaner Future"

Install The Walker Engineering AirSep

AirSep Benefits For Your Diesel Powered Boat.

- ✓ AirSep lowers crankcase pressure allowing your engine to operate more efficiently.
- ✓ AirSep completely captures oily blow-by fumes eliminating them from your engine room.
- ✓ AirSep improves engine performance with hi-flow washable air filters and an advanced air flow enhancing design giving your engine the air it needs.
- ✓ AirSep includes turbo noise reduction technology that reduces the annoying turbo charger whine associated with high many performance diesel engines.
- ✓ AirSep prevents the oil from engine blow-by from contaminating bilge water.

AirSep can be retrofitted to a variety of diesel engines including; John Deere, Caterpillar, Cummins, Detroit Diesel / MTU, Yanmar and many others.

AirSep Features Include.

- Cleanable air filter elements.
- Compact turbo mount system.
- Wide availability of spares.
- A complete line of engine performance products designed to enhance your boating experience.

You can choose Walker Engineering products with confidence knowing there is a growing network of knowledgeable dealers in Australia dedicated to providing you with professional and courteous service, and a good selection of AirSep parts and filters.
