THE FINAL TOUCH FOR WINES AND SPIRITS - IN NO TIME!

TECHNICAL CHARACTERISTICS:

References
- The Original
- Toast Booster
- Vanille Booster
- Spirits Booster

Dimensions of each brick
L 5.98 inches x W 2.4 inches x H 3.07 inches

Unit average weight
- The Original: 1.65 lbs
- Toast Booster: 1.40 lbs
- Vanille Booster: 1.65 lbs
- Spirits Booster: 1.65 lbs

Species available
Each blend incorporates a combination of woods selected from French and American oak.

Toasting
Air convection toast, with a specific toasting protocol for each species.

Packaging
12 bricks per infusion bag
- The Original: 19.8 lbs
- Toast Booster: 16.7 lbs
- Vanille Booster: 19.8 lbs
- Spirits Booster: 19.8 lbs
PE-ALU bag
Box with handle holes

ŒNOFINISHER® IS

• Oak chips for short treatment (1-3 weeks) of wines and spirits.
• Compact to facilitate storage and use, while limiting inhalation of oak dust by users.
• An effective and stable enhancement up until the consumption of your wines and spirits.

USING ŒNOFINISHER® PROVIDES

• Efficient treatment, modifying the sensory profile in very little time:
  - The Original → Imparts sweet notes (fruit, pastry)
  - Toast Booster → Imparts smoked and roasted notes
  - Vanille Booster → Imparts vanilla, caramel and ripe fruit notes
  - Spirits Booster → Conveys floral and fruity notes (when aging in fine-grained American and/or French oak barrels)

THE BEST OF OAK

ŒNOFINISHER® components come exclusively from the best selection and maturation processes of oak used by our cooperages.

Raw material quality is rigorously checked at every stage of the ŒNOFINISHER® manufacturing process, giving you guaranteed precision and regularity.
**IMPLEMENTATION**

Infuse **ŒNOFINISHER®** in the wine/spirit using the provided infusion net. This enables easy removal of the chips, and the treatment presents no risk of pump deterioration.

To ensure an optimal extraction, we recommend a short and regular stirring of OENOFINISHER, twice to 3 times a week (10% of the volume by pumping or nitrogen injection).

The infusion bag is sufficiently fine, so as to not modify the filterability. Treatment is possible both after filtration and just before filtration between packaging and bottling.

For spirits, treatment may lead to slight haziness in the liquid; we recommend treatment prior to stabilization, then filtration.

**DID YOU KNOW?**

- When oak is reduced to chips, or small pieces, most of its volatile compounds are extracted in only a few days. Cutting the wood grain enables rapid extraction.
- The same compound may have different effects, depending on its concentration in the wine and possible sensory interactions with other molecules. We have taken these phenomena into account while formulating **ŒNOFINISHER®**.
- **ŒNOFINISHER®** is designed to provide specific, stable profiles for the duration of wines’ and spirits’ commercial lives, even at very low doses. Our R&D trials have shown excellent stability results at least two years after treatment.
QUALITY AND SAFETY

The ŒNOFINISHER® range is produced under strict manufacturing conditions intended to guarantee food safety and meet current regulatory requirements. The choice of highest quality packaging materials ensures maximum protection against potential contamination during transport and storage.

Quality and food contact certificates are available on request via: info@seguinmoreau.com

REGULATIONS

Prescribed designations: Oak wood chips.
. Resolutions n°03/2005 and n°430/2010 of the œnological Codex adopted by the OIV.

The use of oak wood chips for œnological purposes is subject to regulation. SEGUIN MOREAU cannot be held responsible for the improper use of its products.

STORAGE CONDITIONS

This product is sensitive to odors and airborne contaminants. For best results, store in original packaging, with no ground contact and in a cool and odorless environment.

Recommended storage time: The products in the ŒNOFINISHER® range will retain their sensory properties indefinitely as long as they remain in their original sealed PE-ALU packaging. Once you have opened the package, unused bricks should be kept in the original carefully resealed bag. They can then be kept for one year without quality impairment.
