Celebrating Apollo – Inspiring the Future

Thank you for considering an ASE XXXII Annual Planetary Congress sponsorship. All ASE Congress Sponsorships include supporting astronaut visits on October 16, 2019, to venues of your choice—schools, universities, communities, companies--for the entire “Community” day—as well as other benefits and recognition as described below. Your sponsorships and donations make the five day Congress a reality. All 125 astronaut delegates fund their own travel to the Congress. But since all technical and outreach activities over the five days are open to the public and are also live streamed or broadcast, sponsorships are important for covering Congress expenses and allowing the astronauts to participate in many public events. The goal is to reach 50,000 students in Texas on October 16, 2019. Please join us in the largest gathering of worldwide astronauts in the history of spaceflight, and only the 4th time in the United States since 1985. ASE will celebrate the accomplishment of the Apollo missions 50 years ago, and endeavor to inspire the next generation to reach even farther.
