Cleaning schedules

Clean and disinfect surfaces that are frequently touched within the camp or any shared objects.

The schedule for shared items should be increased and posted so that usage is monitored per the person in charge of the area (director/staff/teacher).

Signs will be posted on how to wash hands and to cover sneezes/coughs in public areas/restrooms.

The bathhouses will be cleaned by spraying down with high pressure water and particulate matter scrubbed and then sprayed with a prepared bleach solution. It will be left for 1-3 minutes before being rinsed with water again. The houses will be cleaned and documented for a minimum twice a day.

The dressing rooms at the pool will be discouraged except in emergent conditions or to use the bathroom. Campers will be asked to pre-dress in their tents and wear a coverup to the pool. Also they will re-dress at their tents or dry off and change into clothes outside of the dressing rooms. The dressing rooms will undergo the same cleaning processes twice a day as the shower/bathhouses.

There shall be one water cooler outside each tent and each camper and staff are responsible from only getting water from the cooler assigned to their tent. Please alert the counselor or a potwasher if the cooler needs refilled. There will be other coolers throughout the camp that will be staffed by a director or staff member and only they are able to dispense from those coolers.

Campers will be required to shower daily at their designated times per COF.
