TENT RULES

Campers are assigned to a tent before arrival. Each corresponding tent in the opposite sex will be assigned to a COF (Circle of Friends). Each tent should stay mainly with their own tent for most activities but can associate with the corresponding COF with the director's permission.

Inside the tent, the cots will be in the standard fashion with heads to the outside of the tent. Tent flaps shall remain up for as much of the session as possible. If a fan is present it must point at the camper and then to the outside of the tent as airstreams should not point to the center of the tent.

Campers are not allowed in other campers tents even in the same gender.

Each camper should try to keep their clothes and personal belongings inside the confines of their personal cot area. They should not share belongings or pillows/beddings with other campers.

Food should not be brought into tents and no nonwatery based drinks. Do NOT DRINK OR EAT After any other camper or staff. Dispose of any trash immediately so as not to get insects in the tents.

Any camper demonstrating coughing/sneezing/fever or chills should immediately report to the counselor who will accompany them to the nurse for treatment. Any Nausea/vomiting should be reported immediately to the nurse.

Campers tubs/suitcases will be taken to the departure area by staff or camper but others belongings should not be touched. The outside of the tubs/suitcases may be sprayed with disinfectant but no clothing/bedding will be sprayed to prevent chemical dermatitis/skin irritations.

No items that melt should be left outside the tent.

No clothing items should be hung from the tent. If need to dry, they should be laid out on a hard surface so that they do not aerosolize particles in the wind.
