

2020 Georgia HOSA Security and Ethical Statement

As Future Health Professionals, HOSA members are held to a higher standard regarding their ethical behavior as a competitor. HOSA members are expected to follow HOSA rules and act honorably and ethically at all times. Plagiarism, copyright violation and falsification of information are inconsistent with the culture of future health professionals. Any attempt to gain an unfair advantage is unacceptable and cannot be tolerated. Violation of the ethics rules will be severely penalized and may lead to forfeiture of future awards/

Georgia HOSA members may not consult with other members, advisors or parents during the testing period.

Tips for Success on Open Book/Open Note Tests

While you prepare your notes and resources before your tests, keep these facts in mind.

Open book/open note tests are not easy. Answering test items takes more time than copying information from notes. Finding facts, formulas, or other information in your notes is only one step to answering a test item—you must apply the information to complete the task.

You still need to prepare for the test. You should prepare for an open book/open note test just as you would a traditional test. Having resources available may save you time in memorizing information; however, you still need to know how to apply the information efficiently and correctly. Test taking requires preparation.

More materials are not always better. You'll need to answer multiple questions on your test and you'll have limited time to do so. The more time you spend looking for information, the less time you'll have to use it in selecting or providing your answer.

You should not copy responses from notes or resources. We designed this year's tests knowing you have access to your notes and resources, so the test questions will ask you to apply concepts you may have in your notes and resources in different ways. Copying what you have done in the past will not produce a satisfactory answer.

Your study notes are better than internet searches. The internet can be an excellent source of data and facts, but it's also a source of misinformation, diverging opinions, and manipulated content. In the experience of our instructors, members taking open book/open note tests who try to find the answer on the internet often earn fewer points than students who use their time to apply their own learning to develop a logical response.

Collaborating with others is not considered acceptable open notes: Tests give you an opportunity to show your mastery of a subject—not someone else's. It is strictly forbidden to give or receive aid during the Test. Any students found using the work of others, exchanging or

sharing information on test topics, collaborating via any online platform, or soliciting tips for problem-solving approaches will be investigated for violating test security.

We are confident that the vast majority of members will follow the rules for taking tests through the Testing Center. For the small number of members who may try to gain an unfair advantage, we have a comprehensive and strict set of protocols to prevent and detect cheating.

HOSA Members Who Violate Exam Security Will Receive Consequences

- HOSA members whose responses mirror online content or other members' submissions will have their scores questioned and possibly cancelled.
- HOSA members sharing or receiving test content or test responses or engaging in any plans or efforts to provide or gain an unfair advantage, will be blocked from testing or their scores will be cancelled. This includes communications or assistance in-person, via the Internet, social media, or any other means.
- If we determine that a HOSA member gained or provided an unfair advantage on a HOSA Test, we'll notify the school so the school can choose to take necessary disciplinary action, as appropriate.
- HOSA members who attempt to gain an unfair advantage also may be prohibited from taking a future HOSA Test at state or international conferences.
- We encourage anyone with knowledge of any dishonest behavior with respect to HOSA Testing to contact HOSA Test Security. Reports can be shared confidentially with contactus@georgiahosa.org
