2019 IFLA World Council

Key Theme 4
Community Involvement and Participation
The model where the prevailing culture is ‘expert’ that has typically led practice, *needs to go*.
Real Problems

How can IFLA help?
Debate Key Questions in Groups (20 min)

Report Back to Council (15 min)

Draw Key Actions (30 min)
1. What values/assets do our communities need to have represented by IFLA?
2. How does IFLA deal with different world-views and cultural competency?
3. What are the main challenges and opportunities for our communities that IFLA should be aware of?
4. What are the current challenges that impact on the wellbeing of our communities?
5. What to do with the connection of the physical, spiritual, mental and communal values of our communities?
6. How can we improve the governance of land and natural resources for our communities?
7. What are the good examples of community involvement and participation through the means of professional practice and/or academic research that IFLA should know about and how could this be strengthened in the future?
8. How can IFLA develop a more coherent approach to policies that empower our communities? Who should we be working with?
9. What are the future opportunities for community participation in Landscape Architecture and its related professions and how can policies change to help realise this potential?
10. How do you envision an integrated framework and policy for community involvement and participation?
