MCE Social Capital’s Global Economic Opportunity Notes are a low-risk, fixed income product that offers investors an opportunity to fund MCE’s lending to financial service providers (FSPs) and small and growing businesses (SGBs) across the developing world.

The FSPs in MCE’s portfolio help people in rural areas gain access to credit, savings accounts, insurance, health and business education, and technical assistance. The SGBs create reliable jobs in rural economies, provide market access to and valuable services to smallholder farmers, and facilitate access to clean water and renewable energy in underserved areas. MCE’s $53.0 million portfolio is backed by $151.5 million in philanthropic guarantees from accredited investors. We have a strong track record with 100% payment of interest and principal to our investors since 2006.

### IN GOOD COMPANY
