## 5D Report: 2020 Year Ahead

### 2020: The Great Reset

*" Another world is not only possible, she is on her way. On a quiet day, I can hear her breathing." Arundhati Roy*

Art by Teresa Goodin: "The Etheric Heart" from her Te Wheke Series: [www.teresagoodin.co.nz](http://www.teresagoodin.co.nz)

# The 2020 Cycles of Convergence

## 2020 is an unprecedented Convergence of 4 key planets: Saturn Pluto Jupiter Eris.

In astrology, the rarity of an event is its currency - a measure of potency and significance. Any year a new cycle begins between two outer planets is noteworthy simply because it's rare for two different long slow cycles to coalesce. But in 2020 something truly unusual is occurring: there are no fewer than 5 new Outer Planet cycles - 3 of them exact conjunctions! This will trigger the Re-Set of the Zeitgeist and the collective mood for the next decade leading to the Great Transformation 2020-30.

**These new cycles interweave all year seeding a new energy climate, ecology and frequency:**

1.	Saturn/Pluto Conjunction	22° Capricorn
2.	Jupiter/Pluto x 3 Conjunctions	24° Capricorn
3.	Jupiter/Saturn Conjunction aka the Great Chronocation	00° Aquarius
5.	Pluto/Chariklo Conjunction	24° Capricorn
6.	Pluto/Eris Squares x 3	23° Capricorn/Aries
	Saturn/Eris Square	23° Capricorn/Aries
	Jupiter Eris squares X 3	23° Capricorn/Aries

With **6 (!) wild card Eclipses + 5 (!) Super Moons**, 2020 does not let up in intensity - there is no more recovery time between evolutionary stairsteps. From the first days of the year until the very last ones, each month adds to the critically important planetary cycles that will define the next decade and far beyond.

**A heads up! 22 degrees of Capricorn to 0 degrees Aquarius in your birth chart are your hot spot and your point of leverage during 2019-2020, as they are activated and re-activated by the super Convergence**

**The density of drama means that the 2020 Vision will incrementally unfold until December 21st 2020 when Jupiter and Saturn ring the great Aquarian Bell of Renewal.**

### 2020 Personal Themes –

- No more Papering over the Cracks
- Beyond Reality Checks + Wake Up Calls
- Choosing Change over Habit
- Mastering Personal Power, Soft Power, Tribal Power
- From being Special to being a Transformer
- From Ego Focus to Eco Focus
- Becoming Self-Supporting
- Conscious Contracting
- From Competition to Collaboration
- Empathy + Inclusivity

## 2020 Collective Themes –

- Changes in the World Order
- The Use of Power-Personal, Soft, Tribal
- The Rise of the 99% + Power Struggles
- Nuclear Karma
- Climate Activism
- Crisis of Natural Resources
- New Technologies
- Food as Medicine
- New Banking+ New Markets
- Career and Status Shifts
- Ageing Populations
- Flow Tribes
- From Competition to Collaboration
- A Shift in consciousness from Ego-System to Eco-System awareness.

Starting this year and intensifying through the 2020s, the extreme acceleration of new progressive, but disruptive technological and cultural developments will be revolutionary and illuminating, but will also have psychological repercussions. Realisations about the ramifications of these disruptive energies will eventually result in a total make-over of human society. This will impact every facet of human culture and society and into all areas of technology, socio-politics and economics... including many current systems of energy production, communication, transportation, travel, healthcare, genetic sciences, robotics and artificial intelligence. These developments will also disrupt the control of resources and the monetary system itself.

Far from being a shortcoming, the elusiveness of the quantum realm will be put to work in the development of revolutionary new technologies, from highly secure bank wirings to ultrasensitive detectors and, potentially, new types of computers.

## The 3 Meta Cycles

### 1. The Saturn/Pluto Conjunction January 12 2020

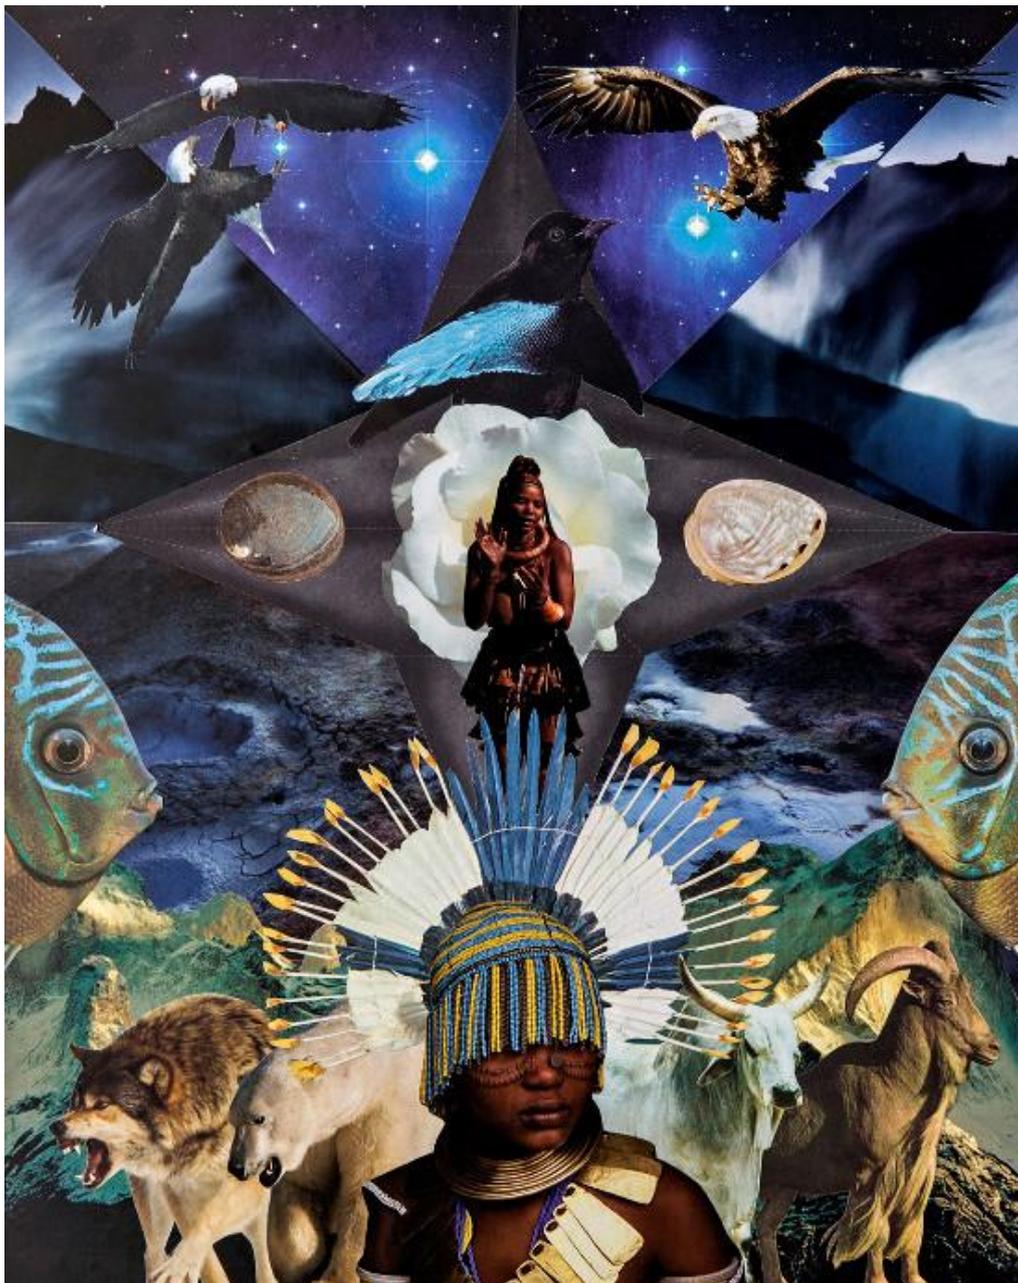

**Headline: Crisis and Compromise for Big Business, Government and Royalty around the World**

**On January 12, 2020, Saturn conjoins Pluto at 22° Capricorn for a single, and dramatic, pass.** It's actually a **Super Stellium** of the Sun, Chariklo, Ceres, Arawn and Mercury within a degree, and the South Nodes of Saturn and Pluto close to this degree. This is what is meant by walking the razor's edge path between two great lines of force as hardcore realist Saturn the Master Teacher encounters implacable change agent Pluto in Capricorn for the first time since 1518 when Martin Luther began the Protestant Revolution. It's a rite of passage, squeezing us through the eye of a needle into a whole new era. **Expect this cycle to have an exceptionally powerful effect for approximately two years following it**, stimulating significant geopolitical dynamics that will affect the distribution of power economically on a global scale. **Saturn conjunct Pluto is**

**very much the nuclear missile of combinations. In a nuclear reaction, one kind of matter is transformed into another, and tremendous energy is released in the process.** Hard aspects between Saturn and Pluto often bring natural disasters, particularly seismic and volcanic activity.

What makes Saturn conjunct Pluto daunting is that over the past decade, we've already seen plenty of shakeups associated with Pluto in Capricorn, starting with the financial crisis of 2008 which became the Great Recession. Now this is combined with reality checker Saturn, removing our blinkers to face the truth head on. Pluto's been in Capricorn — the sign of business, governments and similar institutions — since 2008 and we've witnessed Pluto's slow, relentless undeniable imitation of a wrecking ball smashing the cultural landscape. Pluto's aspects with change - heralding planets Uranus, Saturn and Eris represent major processes and peaks in our collective evolutionary experience.

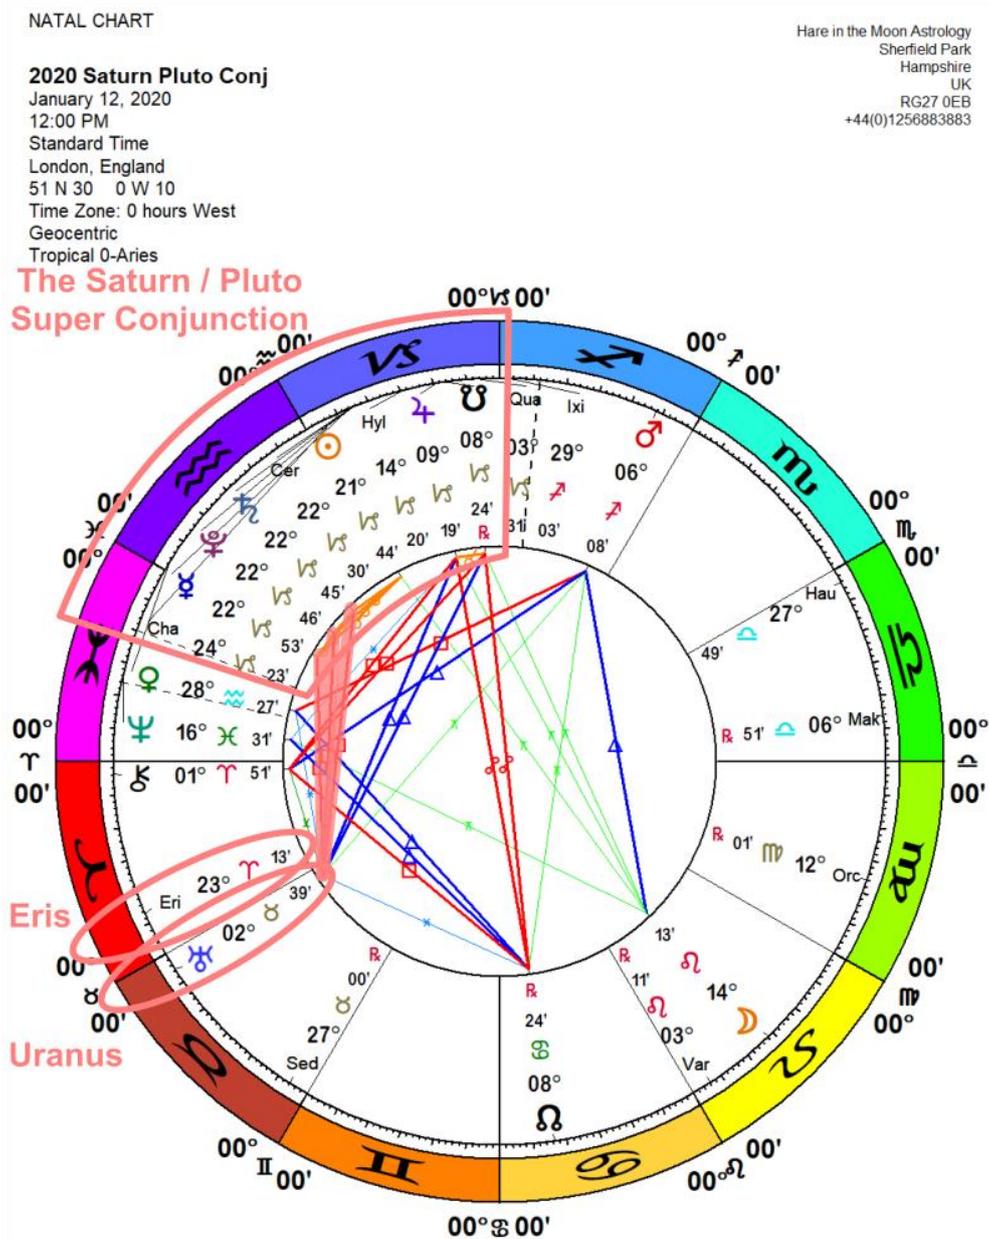

Art by Teresa Goodin: "Standing in One's Own Power" from her The Rites of the Healer Series: [www.teresagoodin.co.nz](http://www.teresagoodin.co.nz)

It looks like imminent wide-scale structural change at a time when society seems to be stranded in an earthquake zone.

**Jupiter brings hope** in this pile-up of such intense, relentless, astrological patterns. In the middle of all the intensity around 12th January 2020 **there is a better future waiting.**

Take a look at the January 12 Saturn/Pluto Eris Alignment in the chart below. It's not just Saturn conjunct Pluto. Stuffed into 1.25 degrees of the zodiac are Mercury, the Sun, Ceres, Saturn, Pluto and Chariklo -- with Jupiter close enough to be considered part of the conjunction. The karmic South Node is there, as is Pholus - and all of it is square disruptor awakener Eris in Aries. **Astrology is producing a lot of gravity in one direction with this event.**

### **The Chandra Symbol for CAPRICORN 22: A Bare Altar covered with Black Velvet.**

“A greater power is at work behind the scenes here. That power is immense, world-shattering. It requires us to be dissected of that aspect of ourselves which stands between us and what we are called here to sense. And with relentless fury, it will not let us be. For we are meant to be forged and fashioned into something beyond the grasp of our historical self. We are being asked to supersede the old patterns and syndromes with something which is already well on its way and just needs our blessing to fulfil its cycle of deep change here. This is a decisive point, personally and collectively. It can go either way. There are good reasons to hold back, to hold out, to ask for better terms. Yet timing is so very crucial. Can we afford to be so sure, when we know it’s well past such considerations? At the last moment, when everything depends upon it, the idols topple; the power-heavy way of life is suddenly gone”.

### **Eris at 23° Aries square the Saturn/Pluto Super Conjunction acts a subversive or chaotic agent.**

5D Planet Eris is active for the whole of 2020 as a Resurrection Goddess, a female Awakener symbolising people and circumstances that are so different that you resist considering them “one of us” and instead see them as the Discomforting Other. A Stranger, an Alien. This messenger of transformation brings growth by disrupting old patterns of thinking, beliefs and expectations, shattering the unexamined and comforting codes of “this is how we do things around here”. Through being challenged over and over by your reaction to radically new concepts and being compelled by circumstances beyond your control to integrate these concepts into a re-designed inner map of the world, you evolve into a much more expansive field of unity consciousness. Eris can be thought of as the Great Disrupter, but with a purpose, shaking up what is stagnant in consciousness, like the grain of sand in the oyster that transforms into an exquisite pearl.

**This Saturn/Pluto/Eris alignment** is not - repeat - not light-hearted energy - historically it’s brought fascism, money market losses, extreme polarisation and the squeezing of the 99%. Expect the 3D knee jerk reaction to be every one for themselves as survival mode kicks in but seen from a 5D soul perspective it calls for visionary activism, fresh ways of eliminating old problems and a refusal to be divided. Saturn and Pluto’s transit through Capricorn is dynamiting the fragmentation and collapse of systems – patriarchal government, family, collective rules and traditions- to seed something much more progressive.

### **Saturn/Pluto Coda**

- **Take responsibility for everything. There is nothing you can do in this life that has any power at all, unless it involves taking responsibility. Taking responsibility is taking power**
- **Make financial independence your priority - what are you going to do differently starting now?**
- **Take concrete steps to becoming self-supporting and self-sustaining**
- **Make your business/purpose sustainable**
- **Streamline + simplify**
- **Eliminate and let go of anything no longer true for you.**
- **What you stop doing, detangle and remove is as important as what you keep**
- **Keep it lean and keep it clean. What would radical simplicity look like for you?**

The Saturn-Pluto-Eris pattern is a wakeup call, summoning all of us to full integrity, maturity and discipline.

## 2. The 3 Jupiter /Pluto Conjunctions April - November 2020

### Headline: Renovation and Restructuring

There are 3 exact Jupiter/Pluto Conjunctions **5 Apr 2020 /30 Jun 2020 /12 Nov 2020** at **24 degrees Capricorn aligned with Awakener Eris in dynamic Aries**, so in reality, they are in effect throughout the entire year.

N.B: The last one a week or so after the 2020 election means that the conjunction is taking shape while the election happens. Jupiter-Pluto is the epicentre astrology of the election itself.

Art by Teresa Goodin: "Walking the path of the Heart" from her The Rites of the Healer Series: [www.teresagoodin.co.nz](http://www.teresagoodin.co.nz)

Jupiter catching up to Pluto in April 2020 adds more momentum and drama to the 2020 influences. The giant and the dwarf planet may seem quite different from each other, but both of them represent **an aspiration for growth and prosperity**. Jupiter/Pluto cycles work on both the material level, where they increase ambition for greater abundance and development, and the spiritual level, where they reflect a deep yearning for Truth. Pluto represents a need to explore the shadows of any issue it becomes involved with, so on the path toward creating abundance and growth, Pluto may also pop many Jupiterian bubbles or excesses, and cause sharp fluctuations between inflation and deflation. On a spiritual level, it may expose false prophets, such as leaders who preach ethical standards but do not walk their talk.

Jupiter the master of solutions and grand cures **Jupiter expands! It opens things up so more becomes possible and we can all explore further – go higher – go wider. We are going to see more women and much more diversity in high level politics and business in 2020. It may also be time for others who have never been allowed at the top, to emerge.** In a positive way, Jupiter/Pluto cycles reflect a remarkable ability to transform difficulty into opportunity, both individually and collectively. It brings the very opposite of grandiosity or entitlement. In the case of Jupiter, with its focus on glory and expansiveness, our wings may be clipped. However, far from being a negative condition, this actually promotes the wisdom associated with a mature Jupiter. Flights of fantasy which focus on potential are re-directed into humbly serving what is there. Realism is the order of the day.

Pluto, as Lord of Transformation, when conjunct Jupiter, brings a review of your beliefs, ideals and aspirations. Horizons may shrink, but in the process you are released from striving towards what is ultimately false. The rhythm of expansion/contraction occurs across all dimensions of life. So the Jupiter/Pluto conjunction will re-balance this expansion/contraction, drawing in energies which have become over-extended, and releasing energies which have become over-contracted.

**The Chandra Symbol for Jupiter/Pluto 24° Capricorn: *Stalagmites and Stalactites almost grown together***  
“At the core of this working, a cosmic power is being brought through. This is sensed as being vitally needed in the world below. And its structural integrity is so massive that it is very hard to translate into a form that other human beings can assimilate. It’s a dynamic propulsion is of an overwhelming destiny kind. The whole Earth is going through radical changes and somebody has to be there to witness and behold, to draw the lessons and meanings into a common currency. Past karmas reverberate. There is a sense that this has happened before and nobody ever responded appropriately. The great bulk of this energy is hidden, is unknown, is out of view. This makes it more potent and decisive. You just have to be stripping yourself away, surrendering your pictures, viewing everything afresh. Yet the baggage is ancient and empirical. These are times when great truths are revealing through cracked strange vessels.”

## Jupiter/Pluto Coda

- **Live it. Own it. Mean it. Play everything at 100%.**
- Find and follow **your own unique cycles of incubate/ ripen/ create/ retreat/ regenerate.** The dynamics will feel slower, because you’re no longer pushing or controlling. There’s nothing to do/be/practice because things need time to evolve and ripen. There are no goals with linear time and dates any longer. It all becomes very intuitive. This is what “going with the flow” means.
- It’s time to **break the Habit of You** - new structures and ways of living are needed for your new Self. You have reached a choice point somewhere between your usual comfort zone and infinity. The task now is to balance living between Structure - supportive routines - and Surprise - the spontaneous, unplanned and mysterious. Start now by deliberately attracting new people, new ideas and new encounters into your life by sensing and seizing emerging flickers of possibility. Jupiter is often described as bringing luck but luck is created when you’re willing to **take risks, follow your hunches and take every opportunity to expand your world.**

## 3. The Jupiter Saturn Conjunction at 0° Aquarius December 21 2020

### Headline: Welcome to the New World Order

**2020 ends with a conjunction of Jupiter and Saturn in the first degree of Aquarius, which is one of the brightest astrological beacons we've had in a long time.**

**Jupiter and Saturn in their new zodiac sign of Aquarius (groups, friendships, communities, networks) will replace the old, dead, corporate and government systems of the 20th and early 21st centuries with the most idealistic, hopeful, vision of the future we have ever seen. These two planets working together in 2021 will pave the way for the arrival of Pluto in Aquarius in 2023.**

Art by Teresa Goodin: "She Who Is Known but also Hidden" from her Te Wheke Series: [www.teresagoodin.co.nz](http://www.teresagoodin.co.nz)

Known from ancient times as **the Great Chronocation**, the 20-year cycle of Jupiter and Saturn is one of the most important markers representing the direction our lives are taking, personally and socially; it sets the tone for the New Order we will all respond to. **It is the midnight chime of the Great Bell of Time and Karma.** This cycle occurs in signs of the same element three consecutive times, then changes to the following element, and then reverts to the previous element one last time. For example, in 1921, the conjunction was in the earth sign of Virgo; in 1940, in the Earth sign of Taurus; in 1961, in the Earth sign of Capricorn; in 1980, in the Air sign of Libra; and then a last return to Earth, the 2000 conjunction in Taurus. From 2020, this conjunction will occur in similar sequence in Air signs.

**The new conjunction will take place at the Solstice on December 21, 2020, at 0 degrees of Aquarius and in a new element - Air. The combination of the conjunction, in a new Air cycle, on the Solstice point aligned with Awakener Uranus in Taurus will seed a new dawn, a new paradigm for humanity to unfold. It symbolises a breakthrough to another side, a shift of consciousness.** The sign of Aquarius flavouring this cycle points to the need to come up with new solutions and elevated global consciousness. While the earlier Earth cycle drew attention to practical and financial matters, the Aquarius cycle will ideally bring a stronger focus on culture, progress, and global emancipation.

At a global level this is the very beginning of a shift from: -

**50 years of Post-Modern social pluralism and focus on relativistic civil rights and environmentalism to**

**Integral - holding multiple perspectives, fluid hierarchies, flexible creative, holistic and cosmo-centric**

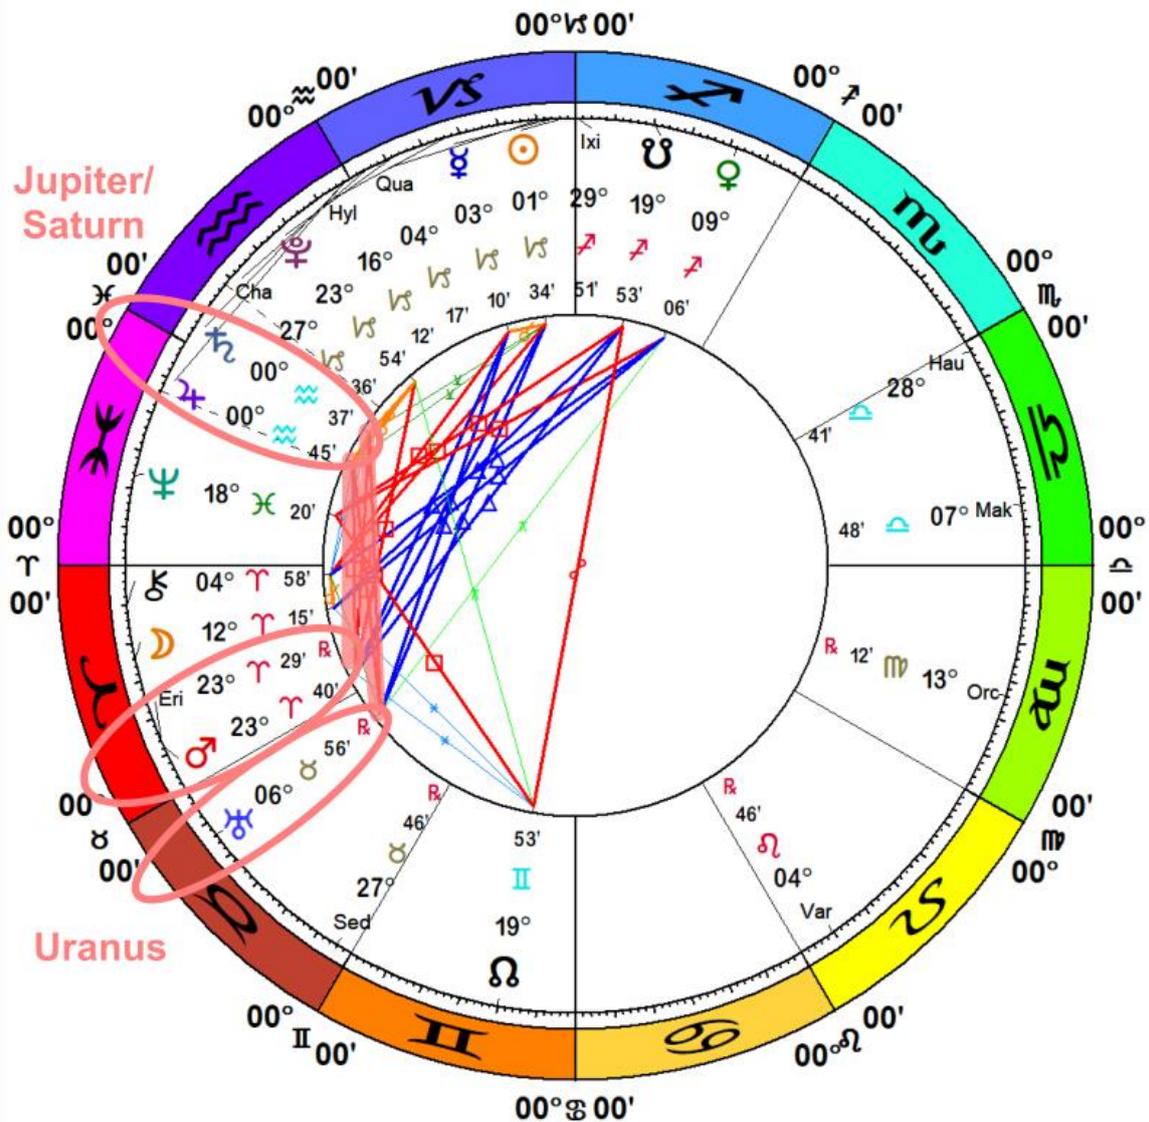

Expect a greater mainstream tolerance of astrology and recognition of it as an essential practice. Aquarius symbolizes the practice of astrology as a tool that allows us to gain a bird's-eye perspective on our lives, connecting life on Earth to larger celestial cycles. The shift from the Taurus cycle to the Aquarius cycle of Jupiter-Saturn may prompt people to look up to the heavens more often!

## AQUARIUS 1

### *A two-headed calf.*

“Taking a good look at things with an eager eye brings you right into the middle of the dilemma of polarities. As you stand there faced with the different sides, you are impartial; neither side pulls you more sharply than the other. Immense opportunity. Huge challenge. You have vital potential for brilliant synthesis, but a subtle temptation to think too long. A schooling in alchemy in every moment -- do you find what is ready to emerge or do you think about it? Progressive evolution draws you through all your mistakes into all that can be.”

## 2020 Calls for Revolutionary Acts:

### Give Up Your Self Improvement Programme - all of it

The more you try to fix yourself the more you reinforce the belief that you're broken.

What would it be like if you stopped trying becoming someone different?

If you stopped the big project of trying to improve yourself, heal yourself or change yourself?

What if you knew - really knew - that you are already fully connected that there is nothing to learn, do, be, practice or enhance with ritual?

Stop trying to heal yourself, improve yourself, even awaken yourself. Let go of letting go. Stop trying to fast-forward the movie of your life, chasing futures that never seem to arrive. Instead, bow deeply to yourself as you actually are. Your pain, your sorrow, your doubts, your deepest longing, your fearful thoughts...are not mistakes, and they aren't asking to be healed. They are asking to be held.

Just look how far you've shifted organically in the last three years from 3D to 4D and during 2020 into 5D:

3D	4D	5D
heart centre closed	heart centre open erratically	High Heart as transformer
energy drawn from others	taking in all energies	energy filters in place
no connection to higher self	spiritual /human self split	higher self-embodied
unconscious	reliance on others for answers	no outer searching
intuition blocked	gurus healing tools channelling	no more working on yourself
monkey mind	head/heart polarity	think with your heart
linear thinking	focusing on what is not working	inside out thinking
following the tribe	trying to wake others up	no identification with labels

## Go to the Heart of Thriving

This 2020 passage is about mastering the soft power of Alignment, Reality Choices and Clarity of the Heart. Your Higher Self will only deliver what you can handle in alignment with your path. With the energies pushing for Personal Evolution – in order to create Collective Evolution – refuse to swallow poison and pay attention to your unique Embodiment, New Creations, Service, Belonging and Path Paving.

To get to the promise and progress promised by the Jupiter/Saturn entry into farsighted Aquarius , differentiate between **hope and expectation**. Expectation is like petrified thought, trapping all your hopes and dreams in a specific form. Hope, by way of contrast, is the spirit of possibility – an energy that will lift you up and carry you forward regardless of how things turn out.
