

Antarctic Krill  
*Euphausia superba*

1. Colour
2. Cut out
3. Fold and glue

Antennae (or you could use wool, string or wire instead!)

Cut along black dashed lines and over lap forward to shape the body of the krill.

Antennae go here,

and here,

and here,

and here!

You can hang your krill on a string.

Fold under and glue shaded area to other side.

Crease along grey dashed lines to shape the body of the krill.
