About Nash Healthcare

Nash Healthcare Consulting prepares healthcare facilities for survey by the Joint Commission, DNV, ACHC and CMS. We work nationally and internationally to prepare acute hospitals, home care and hospice, long term care facilities, behavioral health services, dental, ambulatory settings of all types, office-based practices, and critical access hospitals for the rigorous survey process. Our team of professionals possess decades of survey, administrative, and clinical experience. Our senior consultants were prior surveyors from the Joint Commission and the Centers for Medicare and Medicaid Services or healthcare executives. We meet the unique needs of each healthcare facility by aligning our experience with the culture of the organization. Our services offer team training, plans for improvements, implementing corrective actions, onsite long-term engagements for department improvements and survey preparation.

Core Competencies

- Assessments and mock surveys for accreditation.
- Support and management of Immediate Jeopardy, PDA Immediate Threat to Health and Safety.
- Patient safety risk assessments such as environmental ligature risk evaluations/suicide risk.
- Sterile compounding and medication management evaluations.
- Sterile processing, sterilization, and high-level disinfection evaluations.
- Behavioral Health and Long-Term Care survey readiness.
- Medical staff education and evaluation of medical staff bylaws and implementation of OPPE, and FPPE.
- Infection Control program evaluations and implementation of new processes.
