Course Description

An evidence-based inquiry into the fundamental truths of Islam. See clearly that Islam is not a cultural preference but a clear fact. Follow experienced theologians as they guide you how to respond to common atheist arguments.

Course Syllabus

01. Islam Is Fact

Other religions are cultural preferences, but not Islam. Islam is objectively true and you can prove it. Hamza Karamali explains what this course is about and guides you as you explore some of the differences between Islam, Christianity, Buddhism, and atheism.

02. God Exists

The universe is conclusive evidence for God’s existence. Hamza Karamali walks you through traditional Muslim arguments for the existence of God and helps you discover how these arguments are found throughout the Quran.

03. Science, Materialism, And God

Hamza Karamali explains how to understand laws of nature in light of the arguments for God's existence. He then helps you imagine what science looks like without the bias of materialism.

04. What Does Design Prove?

The favorite theistic argument of our times is the argument from design. Hamza Karamali describes a small flaw in the argument, how that flaw is exploited by atheists, and how the arguments that you have learned can help you avoid this flaw.

05. The Oneness And Majesty Of God

Hamza Karamali discusses the relation between God's oneness and His omnipotence. He teaches you the logical fallacy of "loaded questions", introduces you to a series of loaded questions that atheists ask about God, and helps you answer them yourself.

06. Suffering And Divine Wisdom

You will be surprised to learn that suffering actually proves that God exists! Hamza Karamali will explain why and then hold your hand as you explore the Problem of Evil and Suffering to see exactly why it is flawed.

07. From Reason To Revelation

We can figure out that God exists. We can also figure out that He probably made us for a purpose. But the only way to figure out that purpose is to listen to revelation. God must have sent us revelation.

08. Miracles

Hamza Karamali shows why scientific reasoning does not conflict with belief in miracles, exactly how miracles prove the genuineness of God's messengers, and how to understand miracles that appear at the hands of non-Muslims.

09. Evidence That The Quran Is From God

Hamza Karamali explains why the Quran is the greatest miracle of the Prophet (Allah bless him and give him peace) and how it's still here for everyone to see.

10. Evidence That The Prophet Was God's Messenger

It is impossible for the Prophet (Allah bless him and give him peace) to have been an impostor. Hamza Karamali discusses his many miracles, how we know they really happened, and how his life refutes anyone who would claim that he was an impostor.

11. Evolution And Islam

Hamza Karamali shows you how to join between revelation, reason, and science and then guides you as you learn the evidence for evolution and reconcile it with the direct creation of our father Adam.

12. Morality And The Purpose Of Life

God sent us messengers to teach us the Sacred Law and prepare for the afterlife. Hamza Karamali discusses the Sacred Law, the evidence for resurrection and eternal life after death, and how that affects your life right now.
