CAOSUK ANNUAL CONFERENCE
COMBINED MEETING WITH SICOT

Thursday 4th and Friday 5th June 2020, The Royal Society of Medicine

On behalf of the CAOSUK 2020 organising committee, it is with great pleasure that I welcome you to the Annual Meeting of our Society in London at the Royal Society of Medicine. This year marks the 15th year of the founding of our society and the 6th since we joined as a specialist society of the British Orthopaedic Association. The meeting will be truly international as it will be combined with SICOT. The congress will be followed by a two day CAOSUK EduQual course to be held for the first time at the Imperial College for those wishing to obtain Certification in Computer Assisted Orthopaedic Surgery.

The programme committee has arranged for an exciting scientific programme. The sessions this year will be arranged in a format to showcase both new technology as well as traditional clinical outcomes. All moderators are experts in the field of Computer Assisted Orthopaedic Surgery and will invigorate the discussions.

The advent of computers into all aspect of our lives has been explosive in the past decade and the conference aims to equip both the experts and the novice; the old and the young surgeons with the necessary tools to embark on the next part of this incredible journey. We invite free papers from all over the world and will be providing prizes for the best podium presentation and poster. There will be debates, interactive lectures, plenary speakers from leaders in their fields and invited keynote lectures. The focus will move from computer navigation to include the essential fields of robotics, advanced medical imaging, individual assessments of soft tissue characteristics and customisation. The science and desirability of enhanced recovery, perioperative care and outpatient arthroplasty will be debated.

The SICOT session will focus on simulation, machine learning and artificial intelligence in the field of education, which will be presented by champions and debated by traditionalists.

CHAIRMAN
Mr Ajeya Adhikari
President of British Society for Computer Assisted Orthopaedic Surgery
Consultant Orthopaedic Surgeon
South West London Elective Orthopaedic Centre
Epsom and St Helier University Hospitals NHS Trust

ORGANISING COMMITTEE
Mr Vikas Khanduja
Consultant Orthopaedic Surgeon
Addenbrooke’s Hospital, Cambridge

Mr Dinesh Nathwani
Consultant Orthopaedic Surgeon
Imperial College Healthcare NHS Trust

Mr Fred Picard
Consultant Orthopaedic Surgeon
Golden Jubilee National Hospital, NHS Scotland

Professor Ferdinando Rodriguez Y Baena
Professor of Medical Robotics
Imperial College London
