On behalf of the CAOSUK 2020 organising committee, it is with great pleasure that we welcome you to the Annual Meeting of our Society in London at the Royal Society of Medicine. This year marks the 15th year of the founding of the Society and the 6th year since CAOSUK joined as a Specialist Society of the British Orthopaedic Association. The meeting will be truly international as it will be combined with SICOT.

The Programme Committee under the leadership of its Chair, Professor Frederic Picard has arranged for an exciting scientific program. The sessions this year will be arranged in a format to showcase both new technology as well as traditional clinical outcomes. All moderators are experts in the field of Computer Assisted Orthopaedic Surgery and will invigorate the discussions.

The advent of computers into all aspect of our lives has been explosive in the past decade and the conference aims to equip both the experts and the novice; the old and the young surgeons with the necessary tools to embark on the next part of this incredible journey.

We invite free papers from all over the world and will be providing prizes for the best podium presentation and posters. There will be debates, interactive lectures, plenary speakers from leaders in their fields and invited keynote lectures. The focus will move from Computer Navigation to include the essential fields of Robotics, advanced medical imaging, individual assessments of soft tissue characteristics and Customisation. The science and desirability of enhanced recovery, perioperative care and outpatient arthroplasty will be debated.

The SICOT session will focus on Simulation, Machine Learning and Artificial Intelligence in the field of Education, which will be presented by champions and debated by traditionalists.

We encourage you to book early to avoid disappointment. Stand space will be allocated on a first come, first serve basis and is only booked once confirmed by the Aesculap Academia team upon receipt of completed booking form.

CAOSUK is a charitable organisation dedicated to supporting those applying, developing and using modern technology for orthopaedic surgery. They are an affiliated specialist society of the British Orthopaedic Association (BOA).

www.caosuk.org

SICOT, Société Internationale de Chirurgie Orthopédique et de Traumatologie, is an international non-profit association incorporated under Belgian law with the aim to promote the advancement of the science and art of orthopaedics and traumatology at international level in particular for the improvement of patient care, and to foster and develop teaching, research and education.
