COMPREHENSIVE EVERGLADES RESTORATION PLAN (CERP)
LAKE OKEECHOBEE WATERSHED RESTORATION PROJECT (LOWRP)

Presented to the Task Force by:
Howie Gonzales
Chief, Ecosystem Branch
Programs and Project Management Division
Jacksonville District
U.S. Army Corps of Engineers

September 19, 2019
PRESENTATION PURPOSE

- Update the South Florida Ecosystem Restoration Working Group / Science Coordination Group on progress made to complete the required Project Implementation Report for agency approval and submission to Congress.

AGENDA

- Purpose and Location
- TSP and Benefits
- Project Support
- Current Schedule
LOWRP AND CERP OVERVIEW

- C&SF eliminated much of the floodplain storage and changed conveyance from slow overland flow to rapid canal flow.
- CERP components are intended to restore those functions.
- LOWRP is the only CERP project that influences the timing and distribution of water entering Lake Okeechobee, which is key to Everglades restoration, estuary protection, and water supply.
PROBLEMS

NORTHERN ESTUARIES: High volume freshwater releases from Lake Okeechobee are associated with environmental and economic impacts.

LAKE OKEECHOBEE: Frequent and prolonged high and low water levels affect lake ecology.

WETLANDS: Loss of wetland habitat throughout study area.

WATER SUPPLY: Drainage of the watershed and the associated loss in storage has impacted water supply.

OBJECTIVES

Reduce high volume freshwater releases to the estuaries from Lake Okeechobee to improve habitats in the Northern Estuaries—ACHIEVED.

Improve flows into Lake Okeechobee to increase the amount of time stages are within ecologically preferred levels—ACHIEVED.

Increase the spatial extent and functionality of aquatic and wildlife habitat—ACHIEVED.

Increase availability of the water supply to the existing legal water users of Lake Okeechobee commensurate with improving Lake Okeechobee ecology—ACHIEVED.
TENTATIVELY SELECTED PLAN (TSP) - ALTERNATIVE 1BWR

CO-LOCATING PROJECT COMPONENTS ENHANCES PERFORMANCE

LEGEND
- Wetland Attenuation Feature
- Wetland Restoration
- Tribal Trust Lands
- Tribal Owned Lands
- ASR Well Cluster
- Wetland Attenuation ASR Well Cluster

SHALLOW STORAGE
- K-05 WAF
  ~ 13,600 acres
  46,000 acre-feet storage

AQUIFER, STORAGE & RECOVERY
- 80 ASR wells
- 448,000 acre-feet of storage per year (400 MG/Day)

WETLAND RESTORATION
- KRC: ~1,200 acres
- PR: ~3,500 acres
TENTATIVELY SELECTED PLAN (TSP): ENVIRONMENTAL BENEFITS

NORTHERN ESTUARIES
• Reduces high volume freshwater releases by 16% to St Lucie and 14% to Caloosahatchee
• Increases the resiliency and health of the Northern Estuaries for submerged aquatic vegetation, fisheries and oysters

LAKE OKEECHOBEE
• Improves the lake stage levels and habitat for aquatic and emergent vegetation, fish, and wading birds
• Reduces the rate of spread of invasive/exotic species

WETLAND BENEFITS
• Restores ~4,800 acres of historic Kissimmee River channel and floodplain wetlands
• Provides habitat for a diverse population of plant and animal species

WATER SUPPLY BENEFITS
• Reduces water supply cutback volume to the Lake Okeechobee Service Area (LOSA) by 24%
• Reduces frequency and severity of water restrictions to LOSA
WRITTEN LETTERS OF SUPPORT FOR DRAFT REPORT

- Environmental Protection Agency (EPA)
- Department of Interior (DOI)
- South Florida Water Management District (SFWMD)
- Florida Department of Environmental Protection (FDEP)
- Florida Fish and Wildlife Conservation Commission (FWCC)
- Florida Department of Agriculture and Consumer Services (FDACS)

SUMMARY OF AGENCY/TRIBAL/PUBLIC COMMENTS

- Broad support for storage north of Lake Okeechobee
- Seminole Tribe of Florida (STOF)
- Objects to TSP
- More water storage is needed
- Include water quality features (STAs)
- Mixed support for ASR wells
- Expand study area further north
- Maximize use of public lands
- Acquire land from willing sellers
- Wetland restoration is supported
- Concern of displacement of listed species
- Dam safety concerns
- Water quality concerns
- Support for recreational features
## LAKE OKEECHOBEE WATERSHED RESTORATION PROJECT (LOWRP) SCHEDEULE

### SMART PLANNING PROCESS
