A BEAUTIFUL COLLECTION OF COLOURFUL IMAGES FROM THE BRILLIANT AND INSPIRING NIGHT SKY OF THE NORTHERN HEMISPHERE.

Few natural phenomena compare to the drama, surprise, and beauty of the northern lights. Witnessing their dance across the sky is a magical and unforgettable experience. Capturing the aurora borealis with a camera, though, takes careful planning and persistence, an understanding of the science, attention to the data and conditions, and a dose of luck. For over a decade, landscape photographer Paul Zizka has been on a chase to capture the northern lights – one that has taken him right off his doorstep in Banff, Canada, throughout the Canadian Rockies, and to the far-flung corners of the Northern Hemisphere: the Northwest Territories, Yukon, Nunavik, Labrador, Iceland, and Greenland. This spectacular collection compiles Zizka's finest northern lights photographs and showcases the varied nature of this celestial display in an array of settings. From electric green to royal purple, streaking the sky over mountains or reflecting off iceberg-laden seas, *Spirits in the Sky* displays the aurora borealis like you've never seen it before.

NOW AVAILABLE IN PAPERBACK, THIS ASTOUNDING COLLECTION OF PHOTOGRAPHS CAPTURES SOME OF THE MOST STUNNING MOUNTAIN LANDSCAPES IN NORTH AMERICA.

There is a reason why the Canadian Rockies are some of the most photographed mountains in the world. Rugged peaks encircle glacier-fed lakes, rise up like protective walls around tree-filled valleys, and offer a stunning backdrop to open alpine meadows. They have been photographed from the valley bottoms, from the shores of famous lakes, and from the summits of prominent peaks. They are accessible by vehicle, boat, gondola, skis, and hiking boots. But a lucky few have photographed the Rockies from the air.

In the most comprehensive collection of aerial photos to date, Aloft: Canadian Rockies Aerial Photography by Paul Zizka gives the reader a unique bird's-eye view of this prized mountain range. From vast glaciers to winding rivers, animal overpasses to lakes that look like brilliant spills of turquoise paint on the landscape, these images provide a rare look at mountains that are as grandiose from the skies as they are from their better-known vantage points.
