**Childhood Cancer by the Numbers 2022**

**Every Day**

47

47 Children, ages 0-19, are diagnosed with Cancer.

Childhood cancer is the leading cause of death by disease in children under the age of 19 in the U.S.

Childhood cancer survivors are twice as likely to suffer chronic health conditions.

Despite these facts, childhood cancer research receives just 4% of the annual budget from the National Cancer Institute.
