# Snowman Game Play

"**Snowman**" works just like the classic game "Hangman". At least 2 players are needed, with one player choosing a "secret word" and the other player(s) guessing letters of the alphabet until the secret word is known.

As player(s) choose letters not found in the secret word, a part of a Snowman is drawn on the board. The goal is to guess the secret word before a full Snowman is drawn. When the player(s) correctly guess the secret word before the full Snowman is drawn, then they get to take a turn choosing the secret word while the other player(s) guess.

In Snowman, the following parts of the snowman can be drawn before the Snowman is considered "full" (9 pieces):

- Bottom snowball
- Middle snowball
- Top snowball
- Left arm
- Right Arm
- Top Hat
- Left Eye
- Right Eye
- Frown!
