See “Truck Camper Guide” Page for Matching a Truck to a Camper
Matching a Camper to a Truck

When purchasing a Truck Camper, there are a few important factors to consider

1. **The payload capacity** – sometimes this rating is posted in the glove box of your truck, if not, another way to determine payload capacity would be to weigh your truck, full of fuel, people and of course the dog, and then subtract that weight from the (GVWR) posted on the door of your truck (see example to the right) and that difference would equal your payload capacity (weight of camper you can carry). Example, your truck weighs 6800lbs and the GVWR on the door reads 9900lbs your payload would be 3100lbs (9900lbs-6800lbs=3100lbs).

2. **GVWR (Gross Vehicle Weight Rating)** – is the maximum weight the manufacturer rates that truck to carry, including weight of the truck and all people. Cargo, fuel etc.

3. **GAWR (Gross Axle Weight Rating)** – is the maximum rating the manufacturer rates the axles to carry. These ratings are usually posted on the driver’s side doorpost. To determine these ratings on your truck with cargo (camper) weigh your truck with just the front and then just the rear axle on the scales. This will give you your axle weights for your truck with your camper, these weight should fall within the manufacturers axle ratings.

4. **Tire capacity (rating of your tire)** – This is the tiny fine print on the sidewall of your tire, see photo to the right, usually just behind the tire inflation number. This will usually be a direct correlation to the axle ratings and GVWR on a new truck. **This will always be your weak link** in your weight carrying capacity and should always be checked before carrying any load, including a passenger car for that matter. **SAFETY ALERT** – Always make certain you choose tires with the proper load capacity to handle whatever load you are carrying with your vehicle!

5. **COG (Center of Gravity)** – also known as Center of Balance, is the point that the weight of your camper is balanced,. ALP notes the COG on every camper with a large red arrow, this is determined as it is weighed and balanced as it goes out the door. Your camper COG should fall into the “Load Range” of your truck, see your owners manual for this measurement, note example from an owners manual on the left. As you can see in the example, to the right, the COG of this camper easily falls into the load range of this truck. As the owner, it is your responsibility not to exceed the weight or COG specifications of your truck when purchasing a truck camper. Always think safety first before loading a camper on your truck. Please consult your dealer, who can help you select aftermarket items designed to aid in proper use of your truck and camper combination.

**Suspension Enhancements** - Suspension enhancements allow you to manage your load but does not change or add to a trucks GVWR. In some areas you can make upgrades to your truck and then have it inspected by a DOT (Department of Transportation) and you may be able to increase your “legal” GVWR, check with your local licensing agency for details in your area.

**Torklift Stable Loads** - We use and recommend this product. Today’s truck manufacturers market trucks to be our everyday driver, thus they want the empty loaded truck to be as smooth a ride as possible. To accomplish this they lower the overload spring (the heavy weight bearing springs) 3” to 4” lower to give that smoother ride when empty. The problem with this is when you add any weight to the truck it appears to be sitting low in the rear or “overloaded” since the vehicle has to drop 3 to 4” before it touches the overload spring. Stable Loads by Torklift simply fill this space so that as soon as you add the load, the weight immediately sets on the overload springs allowing your trucks suspension to do what it was designed to do, carry a load, a camper in this case.

**Air Bags** - We use and recommend air bags also, in the correct application. Some truck manufacturers recommend airbags in all applications and suggest you inflate them 80 to 100 lbs in the bags. **We don’t recommend air bags to be used in this way**, because in too many cases, this will raise your camper up off of the suspension causing you to have a spongier unsafe ride! If you choose air bags we only recommend you inflate them so that you are just touching the overload springs of your truck for the best ride and handling characteristics.
Looking for the lightest weight, full-featured fiberglass exterior truck campers for your half ton full-size trucks? Well, you’ve found them! The 80RB and 80GS incorporate many truck camper firsts! Special composite panels and building substrates, developed and proven in the automotive and structural housing markets, shed weight while adding incredible strength and impact resistance. **Adventurer’s Exclusive TCC Construction** (True-Composite Construction) meticulously bonds these materials together, along with full closed cell block foam insulation and Lamilux 4000 exterior gel-coat fiberglass to create solid and lightweight structural components backed by our **industry-leading 3-Year Structural Warranty.** **Adventurer meets the challenge** of creating a self-contained truck camper with interior shower, hot water tank, furnace, fresh-water foot flush toilet with fresh, grey and black holding tanks, large refrigerator/freezer, and ample storage and built 4-season ready with tanks, water lines all enclosed inside of the unit for year around camping!
**Adventurer Dinettes,**

**86FB Dinette - right with 2016 Hunter Interior.**
Note the large open living area the 86FB dinette provides for your camping comfort. The large dinette windows really open up this floorplan, shown here is the standard fabric shades for your privacy. The 86FB also comes standard with the Dream Dinette® which easily makes into a bed with a flip of a lever and eliminates that annoying table leg, allowing you much more leg room in your dinette...

**910DB Super U-Dinette right - This floorplan** features the largest dinette in the industry. With the sliding D-Style table you can adjust to use as a face to face style or slide out and rotate for use with a group of people (see bottom right). Note the large windows creating the nice open view of your surroundings. In the foreground you see the industry leading 7cu ft refrigerator with an oversized freezer, extra large refer with plenty of storage in the door and extra large crispers at the bottom...

**Adventurer Exclusive - Electric Power Bunk® (optional).** This 26”x76” power bunk easily moves down for use with the push of a button and as you can see in the pictures below you can still use the lower rear section as a second bunk if needed, all the while leaving your dinette in the made up position! Want another adult bed, then make down the dinette for a 48”x72” additional bed and still have the use of the Power Bunk®. (Available on 910DB only)

**INTERIOR DÉCOR CHOICES**

- **FIJI INTERIOR—BROWN**
- **MYSTIC INTERIOR—GRAY**
- **HUNTER INTERIOR—GREEN**

Build Your Own Camper! Learn more at www.AMLRV.com
Adventurer’s first ever double slide truck camper, is an industry first, and voted Truck Camper Magazine’s Truck Camper of the year by their readers for a good reason. This camper is unique in design with its rear slide-out & peninsula galley, exceptionally large windows and the fact this camper is fully usable with both slides in the in (closed) position! When you see the large roomy Dream Dinette® in the second slide-out or the standard sofa that both make into additional beds to sleep up to 6, you too will agree this is definitely an industry leader! Also note the optional Theater Seating in this photo truly making this your home away from home...
Galley 86SBS - right
The 86SBS galley is one of the main reasons this floorplan has been our #1 selling slide-out model. Look at the abundant counter space, plentiful drawers & storage and the convenient counter top extension for even more counter space when needed.

Galley 116DS - above
This rear slide-out galley is an innovative design in the truck camper industry. With its peninsula countertop you enjoy an open but private galley area for the chef in you to create those family favorite dinners or those romantic evenings in.

Galley 89RB - above
The 89RB galley has been a hit from day one with all of the counter space, abundant drawers and storage. With the forward galley design and larger windows, you really feel the open space while enjoying the great view outdoors...

Galley 80RB - above
This beautiful floorplan has a very open galley design for an 8’ camper. Note the L-design allowing you more counter space, all the while giving you the wide open feeling, making the 80RB feel like a much larger camper!

Cook in & Dine out... Camping, the most relaxing place to get-away from it all and enjoy God’s great outdoors!
116DS California King Bedroom Suite - right
Features large double door wardrobe storage, nightstand and dual windows for cross ventilation, overhead storage and a 72”x84” California King pillow top mattress! (Shown here with optional Heki skylight).

86SBS Queen Bedroom Suite - below - Timberline Interior

80GS - right
Note the roomy east/west bedroom with the optional Camper Caddy for additional storage.

Comfortable Spacious Baths...

Adventurer Truck Camper bathrooms are spacious and designed for easy care and ease of use.

Some models, like the 116DS (right) & 910DB (left) are equipped standard with our exclusive full roof skylight allowing more head room and a whole new dimension of space and light. Full one-piece fiberglass shower stalls are standard in most models.

The 910DB (left) comes complete with a large dry bath including plentiful storage, a separate tub/shower and a porcelain “style” foot flush toilet and new for 2016 expandable shower curtain rod...

**Construction & Special Features**

**Adventurer TCC Construction**

1. **TRU-COMPOSITE® CONSTRUCTION**
   - TCC® WOOD
   - 1 Closed Cell Block Foam
   - 2 High-Gloss Fiberglass Outer Shell
   - 3 Wood Frame
   - 4 Inside Wall Surface
   - 5 Exterior Substrate

2. **TRU-COMPOSITE® CONSTRUCTION**
   - TCC® ALUMINUM
   - 1 Closed Cell Block Foam
   - 2 Lumber Core Insert
   - 3 Aluminum Tube Frame
   - 4 High-Gloss Fiberglass Outer Shell
   - 5 Inside Wall Surface
   - 6 Exterior Substrate

---

**“Were never satisfied until Good is Better... and Better is Best”**

- Erdman Epp, Founder

**Best Framing**

2x4 & 2x2 Aircraft quality welded aluminum framing with lumber core insert for superior strength and structural integrity! Adventurer frames and gussets around all windows, entry and baggage doors! Windows and doors securely attached to a solid structure, not just a foam wall!

**Best Tie-Down Brackets...** Adventurer feels tie-downs are a critical construction area, that is why we use galvanized tie-down brackets bolted through our TCC laminated wing, through angle aluminum with large carriage bolts and body washers giving our Adventurer owners the Best tie-down attachments in the industry!

**Best Insulation...**

Adventurer exclusively uses “Closed Cell” block foam insulation which provides more R-Value per inch than standard foam board. This is the same foam used to manufacturer coffee cups which also does not allow liquid penetration giving our owners the Best Insulation!

**Best wall supports...**

Adventurer exclusively uses “Custom Aluminum Extrusions” creating a solid side wall attachment point that cradles the side wall with full support and then the wall is glued with construction adhesive, clamped and lag screwed together giving our owners the Best side wall attachment!

---
