BLOOD DONOR
CORONAVIRUS (COVID-19) SAFE PASSAGE LETTER
TO BE MADE AVAILABLE TO LAW ENFORCEMENT

As a blood donor who has donated blood or blood products (platelets and/or plasma) with LIFELINE Blood Services, you help provide lifesaving blood products used to treat patients suffering from a host of life-threatening conditions and bleeding issues.

The United States Department of Homeland Security March 19, 2020 Memorandum on Identification of Essential Critical Infrastructure Workers during COVID-19 Response makes it clear that blood donors and employees of the organizations that operate and manage related activities are part of the essential critical infrastructure workforce. Because you are a blood donor, LIFELINE is providing you with this letter for you to present to law enforcement personnel or other authorities as necessary to confirm the importance of your need to travel to and from your residence to donate blood or blood products (platelets and/or plasma) in the event that a stay-in-place or similar order is issued by a federal, state, or local government.

Thank you for being a blood donor.
