Securebook 5.0 was developed after piloting laptop solutions in custody situations in 7 states. Securebook 5.0 takes a ground up approach to building the ideal notebook computer for use in corrections.

**Notebook Specs**

- **Display:** 11.6”, 133x768 TN
- **OS:** Windows 10, Linux, CloudReady (Chrome OS), or Endless OS
- **CPU:** Intel Apollo Lake N3450
- **GPU:** Intel HD Graphic Gen9
- **Memory:** LPDDR3 4GB
- **Storage:** 240GB SSD
- **I/O Ports (onboard):** Aux (3.5mm x 1); Power (12V/3A); Docking Connector (hardware locked); Fingerprint reader
- **Casing:** Transparent A,B,C,D; semi-rugged design; laser etching of key components; security screw design; 2x Kensington lock; docking port
Securebook 5.0 Detailed Specifications and Pricing

Key Features

- **Transparent:**
  - The notebook is shelled in transparent plastic. Like TVs, MP3 players, and other appliances in custody, a transparent chassis allows for quick visual inspection by staff. Even the keyboard is transparent, leaving no crevice for contraband to hide.

- **Secure hardware:**
  - The notebook has no connectivity ports (no USB, no WiFi, no Camera, and no removable storage) built in. There is no amount of BIOS or software which can truly prevent the misuse of these ports, so we eliminated them. We then build the ports back into a proprietary, un-hackable docking station, which you can leave in the classroom or a secure location. When attached to this docking station, you can print, save, network, or regain all the functionality of a normal computer.

- **Secure user accounts:**
  - The notebook has a fingerprint reader. When using Windows, you can require offenders to login with a fingerprint. This prevents them from sharing passwords or transferring content between user accounts. This also allows staff to keep master passwords and enter a user’s account at any time (fingerprint access does not allow for password changes).

- **Small size:**
  - Under 4lbs in total weight and an 11.6” screen, but with a full size keyboard. All the benefits and usability of a normal laptop, but in a form factor less threatening than most books from the library.

- **Battery:**
  - The battery is not-user removable, and integrated into the chassis with security screws

- **Storage:**
  - The motherboard only has the capacity for a single storage drive, a 2.5” HDD slot. This provides the potential to swap in new operating systems for administrators, but prevents any ability of offenders to transfer content from one device to another via even the most obtuse hard drive mounting schemes.

- **Locks:**
  - Kensington port locks on both sides of the notebook provide flexibility in securing the hardware

- **Field Designed:**
  - Designed exclusively for corrections based on input from multiple states and dozens of laptop and tablet deployments

- **Flexible:**
  - Securebook 5.0 can be purchased without an operating system. There are no recurring fees and nothing to tie you to anything proprietary. We work to ensure compatibility with Windows, Ubuntu, Endless OS, and more.

- **Content Solutions:**
  - All OS's compatible with a local RACHEL solution stored on the device
  - Windows version compatible with Lexis Nexus
  - Compatible with other software offerings
Securebook 5.0 Detailed Specifications and Pricing

### Pricing and Logistics

We currently limit in-stock inventory to 240GB SDD / 4GB RAM variants, with and without Wi-Fi, with your choice of Operating System. Other configurations will require minimum order amounts and 8-10 weeks processing time. Custom BIOS options are available for security.

### Securebook 5.0 Pricing

- **Base Price**: $399 per notebook
- **OS**:
  - None (+$0 per unit)
  - Ubuntu (+$0 per unit)
  - Endless OS for Corrections (+$21 per unit)
  - Windows 10 Pro (+$55 per unit)
  - Chrome OS Never ware (+$55 per unit)
- **Connectivity**:
  - Add WiFi 802.11abgn+ac w/ antenna (+$20 per unit) *Limited Availability
- **Storage Options**:
  - 240GB 2.5" SSD (+$60 per unit)
  - Other storage options available for bulk purchases
- **RAM**
  - 4GB LPDDR3 (+$0 per unit)
  - Other RAM options available for bulk purchases
- **Warranty**
  - 180 day hardware warranty (+$0 per unit)
  - 3—year extended warranty (+$169 per unit)

### Securedock 5.0 Pricing

- **Base Price**: $149 per docking station
- **Ports**:
  - HDMI, 2 USB 3.0, Ethernet (+$0 per unit)
  - Add WiFi inside docking station (+$20 per unit)
  - Others available by request (contact us for custom quotes)
- **Warranty**
  - 180 day hardware warranty (+$0 per unit)
  - 3—year extended warranty (+$49 per unit)
