Advanced Cooling. Consistent Comfort.

Micro gel beads deliver maximum cooling benefits in our EVENcor™ GelPlus Memory Foam - an excellent choice for enhanced support and cooling in your premium bedding components. EVENcor™ GelPlus is a viscoelastic foam that contains gel beads throughout its open cells, enabling a cooler surface than its gel-infused counterparts - as well as an enhanced ability to evenly distribute body weight, resulting in maximum pressure point relief. This premium foam also offers the all-climate benefits of our EVENcor™ product line, including consistent, plush comfort and the ability to be compressed and shipped in any environment - even cold climates - making EVENcor™ GelPlus the ideal solution when you want to offer your customers a superior combination of comfort, support and cooling.

Manufacturer Benefits

• Ability to fabricate consistently in all climates
• Option to compress and ship product
• Reduced returns
• Consistent, even performance

Consumer Benefits

• Micro gel beads throughout for boosted cooling experience
• Wicks heat away from body
• Plush, luxurious, consistent feel in all climates
• Enhanced body weight distribution
• Premium comfort and support plus enhanced cooling

EVENcor™ GelPlus Memory Foam demonstrates the ability to stay cooler longer than traditional memory foam and standard gel-infused memory foam.
