Fluoroscopic-Guided Minimally Invasive Spine Surgery

Inspan is inserted through a small open midline incision. Most surgeries can be done outpatient with rapid recovery and relief.
Spine Pain

Potential causes
• Degenerative disc
• Herniated discs
• Painful facet joints
• Spinal stenosis
• Spondylolisthesis
• Scoliosis
• Spinal Fractures

Symptoms
• Back, buttock or leg pain
• Difficulty walking
• Numbness in your legs, calves, or buttocks
• Weakness and / or loss of balance

Healthy Disc

Degenerative Disc

Surgery Candidates
• Pain for more than 6 months
• X-Ray & CT/MRI imaging
• Failed non-surgical treatment such as medication, therapy, activity modification and injections (epidural facet block)

Post-Op Instructions
• Keep dressing dry for 7-10 days
• Take antibiotics for 5 days
• Take pain meds as prescribed
• No NSAIDs for 12 weeks
• Walking as tolerated
• No lifting above 10 lbs
• No running or jumping for 12 weeks
• Regular diet
• NO smoking
• Wear back brace as prescribed

Indications For Use:
The Inspan ScrewLES Fusion System is a posterior non-pedicle supplemental fixation system intended for use in the non-cervical spine (T1-S1). It is intended for plate fixation/attachment to the spinous process for the purpose of achieving supplemental fusion for the following indications: spondylolisthesis, trauma (fracture or dislocation), tumor, degenerative disc disease (defined as discogenic pain with degeneration of the disc confirmed by history and radiographic studies) or lumbar spinal stenosis. The device is intended for use with bone graft material and is not intended for stand-alone use.
