## Drilling re-commences at Hog Ranch

Rex Minerals Ltd (Rex or the Company) is pleased to announce that exploration drilling has re-commenced at the Company's 100% owned Hog Ranch Gold Project located in Nevada, USA. The reverse circulation (RC) drill program will consist of 2000-3000m for up to 12 drill holes and will be completed over the next five weeks.

This, our last program for the year and weather permitting, is targeting three areas of interest at Airport, Bells and Krista.

Gold mineralisation at Airport remains open in all directions, and we will test strike extensions to the mineralisation now defined by the existing Mineral Resource and the recently identified gold bearing structures. These holes are following up on the recent discovery holes which included:

- HR21-012 which intersected 56.4m @ 2.12g/t gold from 54.9m (Rex announcement, 27 August 2021); and
- HR21-010 which intersected 114m @ 0.64g/t gold from 94.5m (Rex announcement, 26 July 2021).

Drilling is also planned for the Bells and Krista Projects which will focus on Resource extensions in breccia features, which remain open at depth.

Laboratory turnaround times are estimated at six to eight weeks.
