WHEREAS, the City Commission finds that fossil fuels are the largest contributor to global climate change, accounting for as much as 75 percent of greenhouse gas emissions; and

WHEREAS, the City Commission finds there is an urgent need to end expansion of new fossil fuel production, and a national and international imperative to agree on an equitable phase out of existing fossil fuel production and transition to alternative "clean" energy sources, in line with the Paris Agreement's goal of keeping the global average temperature to 1.5 degrees C above pre-industrial levels to prevent worsening and potentially irreversible effects of climate change; and

WHEREAS, in 2021, the United Nations Human Rights Council adopted landmark legislation, Resolution 48/13, recognizing that a clean, healthy and sustainable environment is a human right; and

WHEREAS, the City Commission recognizes the need for a mechanism for international cooperation on fossil fuel production, such as a Fossil Fuel Non-Proliferation Treaty to further progress toward addressing climate change and ecological crises; and
