COVID-19 Prevention Kits

We're handing out COVID-19 prevention kits to our unhoused neighbors and service partners.

Plan how many hygiene kits you’d like to make with your group.

Estimate 100 kits/an hour for a group of 15 people. Purchase or get donations for the items listed. Please note, regular sized items, especially shampoo/conditioner and lotion is hard for people to carry around. Travel size and unused items only please.

Assemble hygiene kits; begin by separating hygiene items by type.

Once the items are separated by type, create an assembly line and package each item into gallon sized plastic bags, or re-usable totes and *package them into boxes.

*Pro Tip: Seal up the plastic bags 2/3 of the way, and roll the items over to rid the air and seal immediately. You’ll be able to package more kits into each box!

Schedule drop-off, or ship to any of our office/warehouse locations.

LavaMaex has drop-off and shipping locations in San Francisco, Alameda, and Los Angeles. Shipping and drop-off location depends on the size of the donation. Contact us to schedule a drop-off/shipping.
