COYOTE HILLS

Annual *Limousin & Lim-Flex* Production Sale

Saturday, April 30, 2022
Noon - Note New Time
at Coyote Hills Ranch
Chattanooga, Oklahoma

*(located 18 miles east of Frederick, Oklahoma on Hwy. 5, or
1 mile west, 2 miles south, and 1 mile west of Chattanooga,
Oklahoma on Hwy. 5. See map on back cover.)*

The entire sale offering has been developed to deliver a product with calving-ease, growth, muscle and marbling in a black, polled, docile package. Raised in the arid conditions of southwest Oklahoma and West Texas, these cattle represent some of the top genetics available in the Limousin breed's Lim-Flex program.

SELLING 116 LOTS, INCLUDING:

- 86 Cow/Calf Pairs – average age 4.2-years-old
ALL are Black and Polled, 53 are Double Homozygous
72 Pairs Homo Polled, 11 Double Polled
70 Pairs Homo Black, 8 Double Black
60 have fall-born calves and are rebred – calves will be split sale day
25 have spring-born calves at side which will sell with their dam
- 13 Bred Heifers – All Black & Polled, 8 Double Homozygous, average age 1.8-years-old, bred to calve in the fall
- 17 twelve to 20-month-old Black Polled Lim-Flex and Percentage (one) bulls, semen-tested and trich-tested, 15 are Double Homozygous

HEIFERS
purchased here may still
be entered in the Nat'l
Jr. Heifer Show at the
regular \$80 entry fee.

Guest Consignors include:

Lawrence Family Limousin & Tucker Parkinson – Anton, TX – 806/790-2535
Diamond Hill Cattle Co. – Newcastle, OK – 405/520-5846
Just-A-Mere Farms – Thornville, OH – 740/572-6983
Brooks Cattle Co. – Marietta, OK – 580/695-2036
(Peyton & Kinley Collum and Bentley & Beau London)
Churchman Limousin – Comanche, OK – 580/467-6966

Certified Bangs Free Herd No. 826—For more information, contact:

COYOTE HILLS RANCH

Dear Friends,

On behalf of the Ken Holloway Family, we welcome you to Coyote Hills Ranch. Our father, Ken, had emergency open heart surgery on March 8. On April 3 he passed from this life. We appreciate the many thoughts and prayers that have gone out recently for Dad and our family. We are proceeding on with normal ranch activities just as Dad would wish.

We trust you will come and view the sale offering in person, if not view them online. These cattle have been raised in the arid, short-grass country of southwest Oklahoma and west Texas. They have thrived and performed well for us and we feel certain they will for you.

As we embark on our 51st year of breeding Limousin and Lim-Flex cattle, we want to pause to express our gratitude to several breeders who have joined us for several years. Namely Dr. Mark Barker of Diamond Hill Cattle Co., Bruce and Paula Lawrence and the entire family at Lawrence Family Limousin, Richard and Joy Boring of Just-A-Mere Limousin and Chuck and Michelle Barton and family — Brittainy, Chris and Colton. We consider our group as a TEAM — Together Everybody Accomplishes More.

Brooks Cattle Company brings a great offering of cows to this sale this year. The Brooks grandchildren include Peyton and Kinley Collum and Bently and Beau London. Several of their offering includes former show heifers that have in turn made outstanding brood cows.

Churchman Limousin of Comanche, Oklahoma also brings a select few top herd sire prospects.

This year's offering includes an outstanding group of high-quality high-performing, young cattle sired by some of the breed's top bulls. Average age of the females selling is 4.2 years.

We have attempted to provide as much information as possible in this catalog and additional info will be posted on our website — www.coyotehillsok.com, or on our supplemental to this catalog prior to the sale. Videos can be viewed online also.

We look forward to your interest. Let us know if we can answer any questions prior to sale day.

Sincerely,

Shari & Shana Holloway

KEN HOLLOWAY
JAN. 14, 1944 – APRIL 3, 2022

Congratulations!

GRAND CHAMPION PEN OF LIM-FLEX BULLS • CATTLEMEN'S CONGRESS

We again congratulate those who show our genetics successfully. The Lawrence Family Limousin continues their success on the tan bark by winning Pen of Three Lim-Flex bull show for two years in a row at the Cattlemen's Congress in Oklahoma City. One of the bulls was sired by LFL Dividend, a bull raised in the LFL program and is co-owned with Coyote Hills Ranch. All three bulls' dams were raised at Lawrence Family Limousin.

There are several cows in the sale that are half sibs to both the sires and dams to these bulls.

Congratulations to Lawrence Family Limousin on their continued success in the Lim-Flex Bull Show!

Congratulations to Tucker Parkinson, Bruce and Paula Lawrence's grandson, on his latest success with his bred-and-owned heifer, LFL Havana, who won Supreme Reserve Champion Exotic Female at the 2022 Houston Livestock Show and Rodeo! Congratulations Tucker!

There are half-sisters to Havana in this sale as well as several lots in the sale carrying the service of LFL Deluxe Edition, the sire of Havana as well as a half brother to Havana, LFL Gavin, the 2021 After 5 Champion who was purchased by Brooks Cattle Co. Several of their consignments are carrying his service as well.

CHR COBN HENLI 124H

Congratulations also go to young showman Calin Kinder. Calin has successfully shown CHR COBN Henli 124H. She was a class winner at the Cattlemen's Congress in both the open and junior divisions. Calin and Henli claimed reserve division champion at the Tulsa State Fair junior show and the Oklahoma Youth Expo. She also claimed Reserve Supreme Champion at his tough county show in Canadian County, Oklahoma. Congratulations Calin and good luck in the days ahead.

LFL HAVANA

Terms & Conditions

IDENTIFICATION OF ANIMALS: (1) Each animal sold will have a readable tattoo corresponding to its registration paper. (2) Seller agrees to check all tattoos for accuracy prior to the sale. The buyer has the responsibility for rechecking the tattoos after taking possession and reporting any discrepancies to the seller immediately. (3) All animals to be sold will be identified by their official registration number, their tattoo and their registered name. If nicknames are used, they should be in addition to the other information. (4) The NALF board recommends that when any animal is sold, there is complete disclosure of any retained genetics in the form of pregnant recipients, frozen embryos or frozen semen.

REGISTRATION CERTIFICATES: (1) The seller of the animal will submit the original registration certificate with transfer information or an application for registration with transfer information on it so that a certificate can be produced by the Foundation and transferred to the new buyer. The seller must sign the back of the certificate on the application to authorize the transfer. (2) It is the responsibility of the seller to provide the North American Limousin Foundation with the buyer's complete name, address and membership number (if available) so that we can complete the transfer. It is important that the membership number be given if the buyer is already a member of NALF. (3) It is the seller's responsibility to provide the certificate or application, and transfer information to NALF within 60 days following the date of sale, and pay transfer and registration fees.

TERMS: (1) Terms of all sales are considered to be cash unless credit arrangements have been made prior to the sale between the buyer and the seller.

HEALTH: (1) On all animals sold, health tests will be announced at the sale or printed in the sale catalog. It is understood that health papers reflect the condition of the animal at the time of the sale but carry no further guarantee as to the future health of the animal. (2) Buyers having special health requests or who wish to take cattle into states with specific and rigid health regulations should inquire specifically about the health tests required for entry into their state. (3) All females sold are considered to be calfhood vaccinated for Brucellosis unless they are otherwise stated in the catalog or announced from the block. It is suggested that verification of vaccination be written on the health certificate.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. It shall be the obligation of the purchaser to see that trucking of the animal and care of the animal are taken care of prior to leaving the sale location.

ANNOUNCEMENTS: (1) Any change from the information that is printed in the catalog will be announced from the auction block. (2) All announcements made from the auction block take precedence over the printed catalog. (3) Catalogued lots not selling will be announced prior to the sale.

BREEDING GUARANTEE: (1) All animals are guaranteed to be breeders with the exception of: a. calves under twelve months of age; b. in the event of any injury or disease that occurs to the calf after sale or; c. gross negligence or willful misconduct on the part of the purchaser; d. females used in embryo transplant. (2) Bulls are guaranteed to be breeders at the time of sale or at 16 months of age if they are younger than 16 months at time of sale. Any bull which either settles cows by natural service and/or passes a fertility test made by a competent veterinarian is considered to be fertile. Any guarantee with respect to the ability to freeze semen shall be a separate agreement between buyer and seller. (3) Females sold as safe in calf have been examined by a competent veterinarian or other reproductive

technician and are so guaranteed to be with calf. Cows with calf at side are considered breeders as indicated by the calf at side. (4) Any guarantee with respect to embryo transplant production shall be a separate agreement between buyer and seller.

OPTION AND PRIVILEGE OF RETURN OR ADJUSTMENT: (1) All claims for adjustments or refunds must be made in writing either within six months of the date of the sale or no later than six months after the animal reaches 18 months of age, whichever occurs last. (2) In the event that an animal is claimed to be a non-breeder, that animal must be returned to the farm of the seller in good condition and must have met the health requirements of the original sell state. The seller shall be entitled to six months trial following the return of the animal in which to prove the animal is a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the total purchase price. The return of the purchase price shall in all cases be deemed as full settlement.

Any expense incurred in transporting the animal that is claimed to be a non-breeder shall be the responsibility of the purchaser except that the seller shall be responsible for transportation costs in the excess of the distance between the purchaser's farm and the location of the sale. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation. (3) It is the obligation of the buyer and seller to negotiate any settlements on cattle that have not been properly presented at a sale. The selling of an animal constitutes a contract between buyer and sell and is not the responsibility or the right of the North American Limousin Foundation or of the sale management firm to settle disagreements between buyers and sellers of cattle that have not been properly presented.

The return of an animal at the expense of the purchaser with a refund of the purchase price made by the seller is in all cases considered to be a complete settlement. Other settlements which are negotiated between buyer and seller may be equitable to cover instances in which cattle are not as represented sale day, but that does not warrant complete return of the animal.

BLOOD TYPING FOR PARENTAGE VERIFICATION: All animals sold are guaranteed to be offspring of their recorded parents. Under the rules of NALF, all bulls born after January 1, 1991 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987 that are to be used for embryo transplant and all bulls born between July 1, 1987 and December 31, 1990 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be sire verified through blood samples available to purchasers upon written request by the purchasers so long as written request is received by sellers within 60 days after the date of the sale of the applicable animal. Proto test guaranteed normal if done within 60 days of sale date.

INSURANCE: Anyone wishing to insure their purchases may do so by contacting the sale manager or settling clerk.

MAIL BIDS: Mailed or telephoned bids will be handled in a most confidential manner if you are unable to attend the sale personally. By contacting a representative of American Cattle Services, Inc., in advance prior to sale day, you will enable us to assist you at ringside on sale day.

EPDS USED IN THIS CATALOG ARE CURRENT AS MARCH 2022

Percentile Breakdown

	Calving Ease Direct	Birth Weight	Weaning Weight	Yearling Weight	Milking Ability	Total Maternal	Calving Ease Maternal	Scrotal Circum.	Carcass Docility	Ribeye Weight	Ribeye Area	Yield Grade	Marbling Score	\$MTI
Current Average of Purebred Active Sires	10	1.6	63	90	22	53	6	0.5	12	22	1.10	-0.54	-0.20	46.06
Current Average of Purebred Active Dams	11	1.4	61	87	22	52	6	0.5	12	20	1.07	-0.53	-0.19	45.57
Current Average of Lim-Flex Active Sires	11	0.8	70	108	21	56	7	1.0	13	34	0.67	-0.18	0.18	59.04
Current Average of Lim-Flex Active Dams	11	0.9	66	102	21	54	7	0.9	12	31	0.67	-0.20	0.15	57.29

In order to allow you to compare these females with the breed average, we have listed their percentile rank along side the EPDs of several of the most economically important traits. This allows you to make quick reference when selecting for specific traits to fit your needs.

Vaccination Program

TIMING PRODUCT SUGGESTION

Birth.....	CalfGuard (if needed)1
Branding (~ 3 months).....	Bovi-shield Gold 5 Ultrachoice™ 7
Prewearing (~ 2-4 weeks prior)	Bovi-Shield™ Gold 5 OneShot™ Ultrabac™ 7/Somubac Spirovac™3 Ivomec™
Weaning	Bovi-shield™ Gold 5 Spirovac™3 Ultrabac™ 7/Somubac
Prebreeding (heifers/developing bulls).....	Bovi-shield “ Gold FP ‘5 VL5 Ivomec
Prebreeding (cows/bulls annually)	Bovi-shield™ Gold FP ‘5 VL5 Spirovac™3 Ivomec™
Pregnancy Exam (cows/bulls annually)	Leptoferm 5™ Ivomec™

1 Rota-corona virus vaccine administered prior to nursing
 2 May be given to calves nursing pregnant cows if cows have been vaccinated within the previous year with Bovi-Shield (or PregGuard).
 3 Spirovac should be administered to breeding animals twice at 4-6 week intervals the first year of administration. Spirovac should be administered as early in life as possible (after 4 weeks of age) to provide immunity prior to exposure and potential development of the carrier state. A preweaning/weaning period is included in the protocol. However, this could be given at branding (followed by a 2-4 week booster) or twice prior to breeding.

NOTES

No more than three gram (-) vaccines administered at one time
 “5-way” Lepto administered twice annual (~ 6 month intervals) in “high risk” herds and once annually in “low risk” herds
 Spirovac™ administered twice the first year and once annually.
 Spirovac™ titers may be a problem for export requirements or AI centers. Consult your veterinarian or AI center personnel prior to administration to breeding animals destined for export or semen collection.
 Bovi-Shield may be used in calves nursing pregnant heifers/cows or in pregnant heifers/cows if the heifers/cows were vaccinated within 12 months. Bovi-Shield must be given initially to open females.
 ScourGuard 3™ (K)/C should be administered precalving if calf scours is a problem. This should be administered twice (at least two weeks apart) the first year, with the second dose given 2-3 weeks before calving. A single annual booster may be given 2-3 weeks before each subsequent calving. Heifers’ calves are twice as likely to develop scours as calves born to mature cows.

CONSIGNED BY: COYOTE HILLS RANCH

- Selling Semen packages only
- Available at \$1000 for 15 units
- Last chance to purchase will be at this sale!
- Cricket's first two calves were bulls that went to Mitch McLaury and Blazin K Limousin
- They posted weaning weights that averaged 782 and yearling weights of 1340
- Her third calf, a heifer by Dividend is in our replacements, and her fourth calf is Hard Rocks
- We are extremely pleased with the MAGS Faultless 154F calves and are pleased that Troy Gulotta made him available on the open market
- Our first few calves have been impressive; bull calves avg WW: 779, heifer calves avg WW: 740 — which included a heifer that won her class at both the junior and open shows at the 2022 Cattlemen's Congress
- Like any seedstock producer, we are constantly in search of that bull that will take us to the next level.
- We think the CHR Hard Rocks 151H bull may be that very bull, allow us to tell you why
- Discovered in a herd contemporary group of 28 bulls in a ranch feeding trial of 70 bulls
- Hard Rocks' individual performance data reads — BW: 72 - fourth best of 28, WW: 725 - third best of 28, ultrasound data: REA 15.94 ratio 10, Fat 0.41 ratio 131, IMF 4.68 ratio 115
- Out of an impressive cow who calved first at 24 months and now has a calving interval of 372 days
- She (CHR Cricket 161C) is an Eagle daughter back to a AUTO Cruze 132X daughter out of a Rulon cow

- Cow AI 12/7/21 to LFL Genetic Values
- Cow PE 12/1/21—3/15/21 to LFL Esquire 7084E
- LFL Dame is a daughter of the senior herd sire LFL Dividend at both Lawrence Family Limousin and Coyote Hills Ranch. These LFL Dividend daughters are making great cows and she is no exception.
- Don't miss her November heifer calf by LFL Esquire. She has the look to make a really nice show heifer prospect.

She had her first calf just passed 24 months of age then we successfully flushed her to LFL Genetic Values which she produced seven grade 1 eggs. We then put her with LFL Esquire and she bred back for a fall 2022 calf! While doing these things she then weaned a darn nice heifer calf that adjusted a 766 lb WW & ratio'd 107.

- Gwen's dam LFL Eye Opener 7301E is owned with Wilder Family Limousin and is a flushmate to LFL Ellis who is owned with Hunt Limousin.
- Study her EPDs, study her performance, look at her outstanding LFL Deluxe Edition heifer calf at side! We think you'll agree this is the kind that's hard to part with. Make her your next donor cow.
- Adj. REA of 15.52 and adj. IMF of 5.62
- Lawrence Family Limousin reserves two flushes with a minimum of six eggs each flush at sellers' expense & buyers' convenience.

Lone Star Shoot-Out

All heifer calves in this sale are eligible to compete in the Lone Star Shoot-Out which will be held in conjunction with the 2023 Fort Worth Stock Show junior Limousin heifer show. The Shoot-Out is open to any Texas 4-H & FFA member who purchases a nominated heifer and tells the clerk sale day that the heifer is to be entered in the Lone Star Shoot-Out.

Management and administration of
Lone Star Shoot-Out program by:
TEXAS LIMOUSIN ASSOCIATION
Leighton Chachere, Exec. Sec.
806/500-8785
email: texaslimousin@gmail.com

Herd Sire Prospects

For Your Quick Reference

Due to the limited amount of time in a fast-paced auction, we are adding an additional tool for your quick reference in making your selection of bulls for a specific purpose. Each bull has been evaluated by physical and visual inspection, pedigree analysis, performance records and EPDs.

B
G
M
C
MB

“B” is in the catalog to indicate those bulls with which we feel comfortable in recommending as calving ease bulls with birth weight EPDs below breed average and most likely suitable to use on heifers.

“G” is noted on those bulls whose evaluation of all criteria including their own performance and EPDs can indicate they can add growth above the breed average.

“M” is listed on those bulls whose pedigree and EPDs indicate they can add maternal ability or milk for those who plan to keep replacement heifers.

“C” is listed on those bulls whose carcass weight EPD and ribeye area EPD exceed breed average thus adding pounds of carcass and muscling to their offspring.

“MB” is listed on those bulls whose marbling EPD and/or ultrasound IMF % indicate their ability to sire offspring to fit the mainstream market.

LIVESTOCK NUTRITION CENTER

BETTER FEED, BETTER RESULTS

Livestock Nutrition Center specializes in blending customized rations, supplements and premixes to meet the specific nutritional needs of your operation. We understand that management, performance objectives and feeding practices can be vastly different between operations, and that these differences dictate specific nutritional or formulation requirements. Our experienced sales staff will work with you to design a feeding program that is specific to your operation.

- Pasture, Rangeland, Forage Rainfall Coverage
- Annual Forage Rainfall Coverage
- Multi-Peril Crop Coverage
- Livestock Risk Protection
- Full Mortality & Specified Perils coverage for livestock
- Farm & Ranch Protection
- Life & Health Coverage

Glossary of the Sale

FERTILITY TESTED - Definition: Bulls' semen has been tested by a licensed veterinarian or a recognized A.I. breeding center and is considered a satisfactory breeder as per the accompanying signed veterinarian certificate.

HEALTH PAPERS - Definition: Proper health papers furnished on all animals in the sale resulting from T.B. and Bangs test.

a. **T.B. Test** - Animals have been tested for T.B. and found negative within thirty (30) days of the sale, both males and females with the exception of young calves or from a TB-free state.

b. **BANGS TEST** - Animals have been tested by licensed veterinarian and have met the requirements for a negative test of the state in which animals sells. This includes all males and females except those exempted from this test due to age, calthood vaccination, or certified Brucellosis free herd status.

BREEDER - The owner or lessee of the dam at the time the dam was served to produce the calf.

OWNER - The individual partnership, or corporation in whose name an animal is registered.

HORNED - Those animals with hard, bony projections from their head. May be surgically removed or dehorned.

POLLED - Those animals that are genetically hornless. They have at least one copy of the polled gene. Animals with both parents polled that have been tested and found not to be homozygous are not listed double polled, but simply polled.

DOUBLE POLLED - Those animals that result from two polled parents and have not been DNA-tested.

HOMOZYGOUS POLLED - Individual has been DNA-tested to be genetically "PP" or proven by parentage to be homozygous thus not carrying the "p" horned gene by pedigree or DNA test.

HOMO (T) - The (T) indicates this animal has been DNA-tested

HOMO (P) - The (P) indicates this animal is homozygous by parentage – both parents are homozygous by test or parentage.

HOMO (P-1) - First generation since tested parents

HOMO (P-2) - Second generation from test

HOMO (P-3) - Third generation from test. There is not a (P-4). Animals must be tested at that point to be certain no errors have been made in testing by the lab or in record-keeping by the breeder.

PUREBRED - Those animals that are 94% or more Limousin.

a. **American Purebred** - Those upgraded purebreds that are 94% or greater Limousin, and 6% or less other breed as indicated by the breed codes. Registration numbers beginning NPM (North American Purebred Male) and NPF (North American Purebred Female).

b. **Fullblood** - Those purebred that are from 100% or full French ancestry. They have registration numbers beginning with NFM (North American Fullblood Male) and NFF (North American Fullblood Female).

HOMOZYGOUS BLACK - DNA-tested by and found to be homozygous black or genotype ED/ED or both parents were DNA-tested homozygous.

DOUBLE BLACK - This notation is made in the catalog to indicate animals with both parents black in color. These animals have NOT been DNA-tested. Animals with both parents black that have been tested and found to be red carriers are not listed as double black, but simply as "black."

LIM-FLEX - Denotes the Limousin-Angus hybrid that may vary in composition from 25-75% Limousin and 25-75% Angus or Red Angus with a maximum allowance of other breed or unknown genetics of 12.5%.

EPD - Expected Progeny Difference - A user friendly way of summarizing performance information for quick reference.

% RANK - Percentile breakdown that allows for quick reference when comparing individuals to current sires of the most recent calf crop recorded with NALF.

(100/89.9) - Percentage of Limousin genetics. The first figure indicates the rounded NALF percentage while the second number is the actual percentage of Limousin genetics.
