

SUSTAINABILITY OPEN DAY 2023

12 OCTOBER, 09:30-16:00 CEST, ONLINE

[REGISTER NOW](#)

SESSION #1:

09:30 - 11:00 CEST

MEASURING & REPORTING IMPACT ON NATURAL CAPITAL

Assessing the business impact on natural capital is increasingly urgent, both to **preserve biodiversity** and to harness its potential for **corporate reporting and investing**.

Nonetheless, the implementation of the European Sustainability Reporting Standards' ESRS E4 on biodiversity and ecosystems has seen a two-year phasing-in flexibility due to the ongoing **methodology-related challenges** of quantifying corporate impacts on biodiversity.

WHY YOU SHOULD JOIN:

- Get an overview of the current **EU policy frameworks on biodiversity and ecosystems**.
- Explore the main challenges and potential solutions in **quantifying and reporting the business impact on natural capital**.
- Learn more about **investors' perspective** on measuring the impact of natural capital.

SESSION #2:

11:30 - 13:00 CEST

UNLOCKING IMPACT WITH SUPPLY CHAIN DUE DILIGENCE

The von der Leyen Commission's **Corporate Sustainability Due Diligence Directive (CSDDD)**, is driving up stakeholders' expectations on companies' effective implementation of environmental and human rights due diligence throughout the value chain.

However, the true challenge lies in going **beyond compliance** to develop supply chains that have a positive impact on the environment and the communities around them.

WHY YOU SHOULD JOIN:

- Discover the **EU regulatory framework around due diligence**.
- Learn how to build up an **integrated approach to supply chain sustainability** from leading businesses.
- Explore how to forge **multi-stakeholder alliances and partnerships** for impactful due diligence.

SESSION #3:

14:00 - 16:00 CEST

TOGETHER 4 STEM VIRTUAL INNOVATION CAMP

In the European Year of Skills 2023, Science, Technology, **Engineering, and Mathematics (STEM)** skills claimed the spotlight, as they are **indispensable for crafting solutions to the pressing climate crisis**.

European students, with a forward-thinking mindset grounded in STEM education, are the **ideal candidates to spearhead the transformative journey ahead**.

WHY YOU SHOULD JOIN:

- Get inspired by the **ideas and solutions of younger generations** to industry-old, unsolved climate-related challenges.
- Explore the **corporate initiatives** to advance on **STEM skills**.
- Learn about the **Climate Education Toolkit for teachers and students** developed by Together 4 STEM partners in collaboration with policymakers, companies, and academics.
