The European industry is at a pivotal moment, grappling with higher stakes than ever before in the run to reach carbon-neutrality by 2050 while transitioning to become fully sustainable, human-centric, and resilient.

Amidst a challenging international context, marked by wars, geopolitical tensions, the spread of misinformation, and the rapid advancement of Artificial Intelligence (AI)-driven disruptive innovations, it is imperative for businesses to foster collaborations. These partnerships should extend not only to peers in their immediate ecosystem but also to entities in the public sector and stakeholders worldwide to unlock the investments necessary for securing the energy and resources vital to sustaining Europe’s future competitiveness and prosperity.

The European Sustainable Industry Summit stands as the premier gathering for forward-thinking companies leading the charge in shaping the next era of corporate sustainability, advancing a resilient, inclusive and environmentally responsible Europe. From 25-26 June, over 300 stakeholders from the industry, European institutions, and civil society organizations will come together at the prestigious BNP Paribas Auditorium, in Brussels. Together, they will define the path forward for industries navigating the complexities of the green and digital transition.

Following the European elections and drawing inspiration from the Antwerp Declaration for a European Industrial Deal and CSR Europe’s Business and European Industrial Deal Manifesto 2024-2029, this Summit is poised to become a springboard for meaningful business transformation beyond compliance.

Over two days, c-level representatives of business, European institutions, and civil society organizations will share invaluable knowledge and strategies to boost the engagement and impact of the European industry with stakeholders inside and outside Europe. The rich agenda features high-level sessions and business cases aimed at addressing key questions on the future of the European industry:

- What proactive measures can companies adopt to secure access to essential raw materials?
- How can different industries harness the power of AI and digitalization to bolster their corporate sustainability performance?
- What are viable solutions to the EU’s energy challenge?
- What corporate strategies are effective in leveraging the current EU regulatory frameworks as a springboard for meaningful business transformation beyond compliance?
- What is the role of companies and EU institutions in unlocking and streamlining access to sustainable investment opportunities?

The Programme
25-26 June 2024, Auditorium BNP Paribas Rue de la Chancellerie 1, Brussels

**DAY 1 | JUNE 25TH**

ABOUT CSR EUROPE

CSR Europe is the leading European business network for Corporate Sustainability and Responsibility. With our corporate members, National Partner Organisations (NPOs), and Associated Partners, we unite, inspire & support over 10,000 enterprises at local, European and global level.

We support businesses & industry sectors in their transformation and collaboration towards practical solutions and sustainable growth. We are for systemic change. Following the SDGs, we want to co-build with the European leaders and stakeholders an overarching strategy for a Sustainable Europe 2030.
