

# Where skill is currency!

## Training and equipping students for the business of tomorrow.

Business, Engineering, Arts, Technology, and Science. Each discipline opens the door for students to explore their passion and future calling. Critical thinking skills are used to solve problems in the context of team collaborations, while examining the Biblical principles in each discipline. We are challenging students to think outside the box, and nurture their God-given talents. Our goal is to integrate each discipline into a cohesive learning paradigm based on real-world applications and a Biblical worldview.

## BEATS Events...

Students will come up with a product and sell that product at the ACS Market. Classes have created their own currency to be used during the Business Day. Students will learn the importance of Econ and Trade, plus Entrepreneurship!

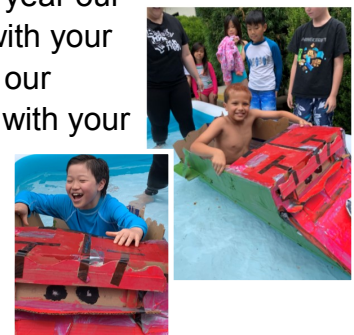

**Two of the chief defenders of the faith in the Old Testament and in the New - Moses and Paul - were both well-versed in the language, the thinking, and the philosophy of their cultures. - Ravi Zacharias**

## ARCADIA CHRISTIAN SCHOOL KIDZ KLUB

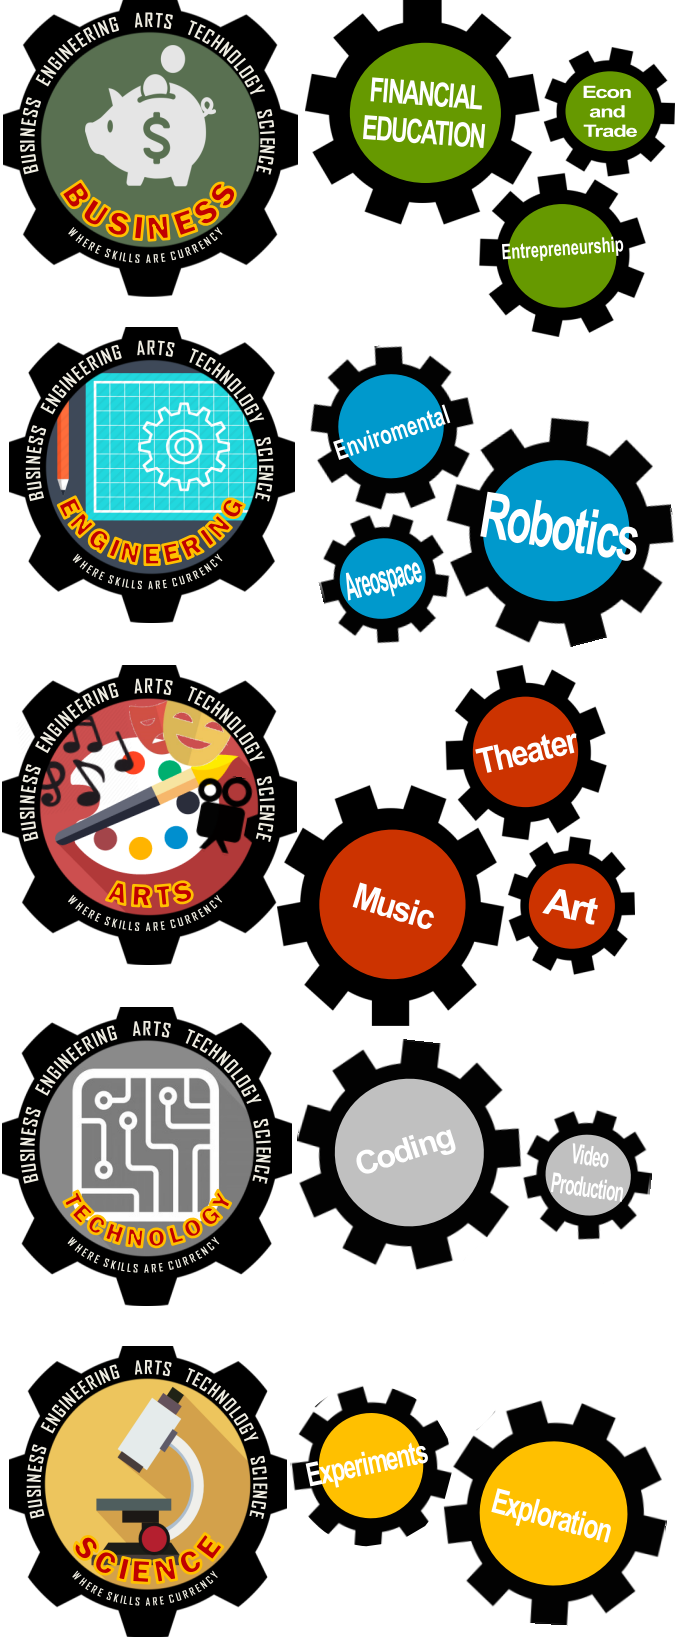

June - August

ACS Summer Academy, where learning is exciting, creative and always fun. Each year our summer program is designed with your child's best interest. Each year our summer program is designed with your child's best interest.

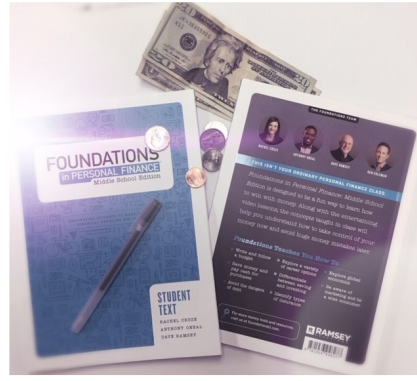

It is the goal of the **BEATS Program** to integrate each discipline into a cohesive learning paradigm based on real-world applications and a biblical worldview. Each discipline will focus on the following areas:

All grades are challenged to use the Scientific method by accomplishing various project, all to be showcased in the Spring!

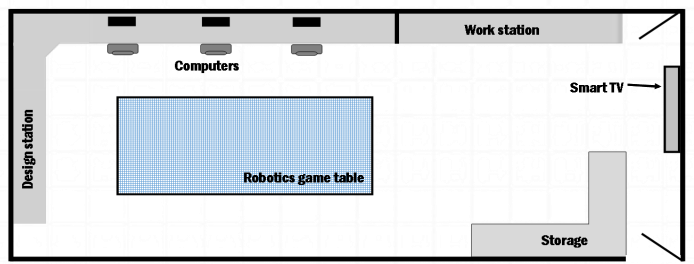

Once a week K - 4th grade go to the Science Lab with MS Science Teacher Mrs. Martinez to learn and do fun experiments using the Scientific Method!

7th Grade uses the Foundation in Personal Finance by Dave Ramsey to learn the importance of budgeting and economics.

# For the future...

## ACS Robotics Room

**ARCADIA CHRISTIAN ROBOTICS**
