The government wishes to deliver a financial system which supports and enables a transition to net-zero greenhouse gas emissions. An engaging dialogue with notable finance leaders will explore the extent to which the world’s most systemically important central banks and supervisors are stepping up to the challenge of acting on climate change. Join Positive Money in exploring the extent to which the world’s most systemically important financial institutions are stepping up to the challenge of acting on climate change.

Central Banking Scorecard
Positive Money is hosting a live presentation of our recently published outcome report, “Seeds of Change,” during the Ceres 2021 Conference: “The government wishes to deliver a financial system which supports and enables a transition to net-zero greenhouse gas emissions.”

Confirmed speakers for this event include: Sandrine Dixson-Decleve, Nick Robins, Slavka Eley, Stuart P.M. Mackintosh, and others.

Join us on April 15th as we explore the role of financial regulation and policy in underpinning the financial sector.

Implications of Climate Change,” during the Ceres 2021 Conference:

The government wishes to deliver a financial system which supports and enables a transition to net-zero greenhouse gas emissions.
