

# How NCL Skill Categories Align to the NIST NICE **Cybersecurity Work Roles**

The National Cyber League (NCL), powered by Cyber Skyline, enables high school and college students across the U.S. to prepare and test themselves against practical cybersecurity challenges they will likely face in the workforce. The National Institute of Standards and Technology (NIST), through the National Initiative for Cybersecurity Education (NICE), has created a widely used Cybersecurity Workforce Framework to standardize cybersecurity competency areas and terminology.

The chart on p. 1-2 shows alignment of the nine NCL Game categories to NIST NICE Cybersecurity **Work Roles**. The chart on p. 3-4 shows alignment of NCL Game categories to NIST NICE Cybersecurity **Specialty Areas**.

Using these two charts, cybersecurity recruiters are able to quickly match the hands-on knowledge and skills of NCL student players to cybersecurity job openings. NCL also aligns with the NSA Centers of Academic Excellence in Cyber Defense (CAE-CD) Knowledge Units and CompTIA Security Certifications.

Visit <u>nationalcyberleague.org</u> for details on getting students involved in the NCL Games.

#### KEY: The National Cyber League (NCL) Competition consists of nine skill categories shown below.
