

PEERS[®]

Program for the Enrichment and Education of Relational Skills

Social Skills Group Treatment for Adolescents with Autism

Basic Information:

- PEERS[®] is an evidence-based social skills intervention for teens, who are interested in learning how to make and maintain friends.
- Teens are taught social skills through didactic lessons/role-play demonstrations and practice these skills during group socialization activities as well as within weekly socializing exercises.
- Parents attend separate, concurrent sessions. Parent participation is required.

Participant Criteria:

- Adolescents aged 12-16
- Participants must be somewhat motivated to participate in PEERS[®]
- Participants typically have an Autism/Autism Spectrum Disorder/ “Asperger’s” diagnosis/ “High functioning” Autism; and/or other social impairments
- Participants typically present with cognitive and verbal skills that are generally age appropriate

Location:

- PEERS[®] will be provided in Ann Arbor, MI.

Day & Time:

- PEERS[®] will start in March 2024
- PEERS[®] will run consecutively for 90 minutes, 1x per week for 14 weeks
- PEERS[®] will be on Thursdays 7-8:30 pm

Pricing:

- Initial 50-minute intake screening (\$225)
- 14-week PEERS[®] group including parent and teen co-occurring sessions (\$125 per week)
- Private pay; Superbills are offered
