Volunteer Position Description

Position Title: Avian Science Committee Chair

Position Description: The Avian Science Committee Chair will oversee the Avian Science Committee, providing guidance and coordination of Committee projects and assisting in recruitment of committee members and community science volunteers. The Committee Chair will advise the Board, researching and providing current knowledge and science-based evidence to be used in decision making.

*Avian Science Committee Duties:*
It shall be the duty of this committee to work cooperatively with other regional organizations and agencies to improve scientific knowledge of birds and their habitats. The committee shall coordinate the Christmas Bird Count and other volunteer-based research projects; develop and maintain information resources on the Society’s website; promote training and education of members and others in field work and record keeping; and provide support to the other avian projects of the Society. Important Bird Areas in our region should be of particular concern to this committee.

Qualifications:
➢ Formal background in the sciences
➢ Experience making recommendations based in science
➢ Visionary and engaging leader with strong communication skills
➢ Passion for the mission of Pilchuck Audubon and a dedicated interest in keeping common birds common and rare birds protected
➢ Excellent organizational skills
