Notes:
National Audubon count code WAED. 15 mile diameter circle centered at Latitude/Longitude: 47.85238/-122.24885.

1. American Crow. Four teams counted the large evening flight of American Crow to their roost site at the UW-Bothell campus. This accounted for 4,959 crows in Area 7S, 1,106 in Area 2, 2,071 in area 8, and 3,788 in area 9S for a total of 11,924 crows. The numbers shown in the individual areas reflect the crows seen using the habitat outside of the hours of the morning and evening roost flights.

2. Boat party. The boat party covered the marine waters in areas 2, 3, 10, and 4. The counts are included in those areas. The time and distance are included in each area. To avoid double counting the number of observers, the observers are only listed once and arbitrarily place in area 10.

3. Crow Counters. The crow counting teams covered four specific sites in areas 2, 9S, 8, and 7S. The counts are in the American Crow total. The time, distance, and number of observers / parties are included in each area.
