

What tools does The Marine **Mammal Center** use to rescue mammals in the ocean?

Just like people, marine mammals can also get sick and need help. The Marine Mammal Center is the world's largest hospital for seals, sea lions, dolphins and other marine mammals. Based in California, and supporting groups around the world, the Center rescues sick and injured animals, rehabilitates them, and releases them back to the wild with a second chance at life. Check out some of the different types of marine mammals, the equipment experts use to rescue them, and some of the items that could be dangerous for marine mammals.

Can you color them in?

Save the Marine Mammals!
