taken above and below the waves of the Antarcticcompared colour pixels from 100 photographsvibrant life that she saw during her seasonal workanything but subtle. To capture the diversity of

Deep Space Prototypes

HEART OF THE WILSON

Earth Seen From Space, 2016

Deep Space Prototypes is an on-site experimental work, prototypes and research connecting deep space exploration with terrestrial biological and social systems. The project is based on findings from deep space probes and planetary explorations to examine specific and unusual conditions within cultures of microorganisms and general research.
