• MRSEC investigators team-up to create an adult coloring book. The coloring book, “Phases of Matter”, designed to help the general public understand physics and phase behavior.

• Interested to learn what are Colloids? Phases? Grain boundaries?

• Designed to reduce stress, sharpen your concentration and nourish creativity. Phase of Matter is a set of twenty-seven distinctive stress-relieving patterns of phases of matter portraying the beauty of physics.

• NYU-MRSEC distributes to visiting high school teachers, faculty and the general public to help create dialogue about physics and materials science.
