Founded in 2007, we are a zero overhead organization where 100% of funds raised directly benefit the cause.

We partner with community-based organizations in Africa to open local bike shops and have shipped 13,000 bikes to date.

We enhance rural communities by providing healthcare workers, teachers, farmers, and students access to bikes.

We create a sustainable ecosystem through employment at the community bike shop.

Profits of the bike shop are then used to fund local aid organizations and schools.
Our mission is to empower people in disadvantaged communities through transformative mobility.

Where mobility is an impeding factor, we improve:

- access to health care, educational, and social services.
- access to life-saving retrovirals.
- economic productivity in communities.
- women’s access to professional opportunities.
Women with bikes overcome adversity

Women with bikes are more able to get produce, goods, and crafts to market for sale. To further encourage women’s empowerment, we train women for staff and leadership positions.

Girls are 70% more likely to go to school if the family has a bike.
Women with bikes overcome adversity. 70% consistent anti-retroviral supply, family unit remains intact. BIKE = POWER

B4H enables healthcare access. Healthcare workers can travel 4X farther than they can on foot.

Quasi-urban and transit centers present the greatest concentration of HIV risk. Family members have poor access to healthcare due to distance. Increased financial instability and understanding of the realities of HIV. Family ecosystems are threatened and future lifestyles become uncertain.
KEY FACTORS FOR SUCCESS

An aid organization committed to the bike shop

Town council willing to provide land for the bike shop

Community leaders willing to support the project

ENTHUSIASM + COMMITMENT = SUCCESS

We flourish in rural communities where the lack of transportation is a major impediment to receiving healthcare, and where there is enthusiasm for our mission.
BICYCLES FOR HUMANITY ANNUAL REPORT 2019

BIKES AND BOXES HAVE A LASTING IMPACT

The bike shop provides enduring employment. We ship the container to a rural community in Africa. The container converts into a sustainable bike shop. We collect and repair 400 bikes per container.

THE NET RESULT IS:

funding for local schools, health clinics, and infrastructure projects (through bike sales); and mobility for healthcare workers and community members seeking education and employment opportunities.
THE BICYCLE LIFECYCLE

- **20%** Given to mobile healthcare workers
- **10%** Sold to pay staff
- **70%** Sold to support local initiatives

*Bike Distribution*
**TIME**

The average person can walk 2.5 miles in 1 hour – this equals access to an area of approximately 20 square miles.

**EFFORT**

As time increases, effort to travel increases. Riding a bicycle requires less effort, allowing one to travel four times the distance.

**CAPACITY**

Riding a bicycle increases one’s capacity to carry a load by five times.

20 square miles

310 square miles

By bicycle, that same person could cover 310 square miles in the same amount of time.
The Nuremberg Uukumwe bike shop in Namibia represents a number of achievements for Bicycles for Humanity. As our first bike shop, originating in 2008, it was a bit of an experiment. Testing our capabilities. Gothard joined us in 2010 first as a bike mechanic and ultimately ascended to the manager in 2011. Tireless, dedicated and optimistic describes Gothard well. Aside from the bike shop success, Gothard identified a community need. Compulsory education in Namibia begins at first grade. However, just like in the US, parents of Namibia seek to give their children a head start and it is from this idea and Gothard’s leadership, the Sirungu kindergarten was born.

Educating 20-30 children each session, the kindergarten has helped underprivileged children of this rural community get ahead, learning their ABC’s in a safe and caring education environment with access to clean water.

Following Gothard’s leadership and vision for 10 years, our collective community impact continues to thrive. Gothard Kamanya is proof positive, bicycles can change the world.
The UUKUMWE Bike Shop – means “Togetherness”
WE ARE GROWING IN 2020
We will open a new bike shop in Malawi.

We will ship over 1600 bikes.

We will generate funds to support 100+ kids into secondary school.

We will rejuvenate an old bike shop in Nyangana, Namibia.

We will continue to be a change agent in rural African communities.
$16,000
THE TOTAL COST OF THE BIKE SHOP

Shipping containers to house bike shop
3,000

Ocean shipping to Africa
8,000

Land transport to African villages
3,000

Parts and tools for bike shop
1,000

Retrofit container to a bike shop
1,000
