

# WE WILL STOP THE PIPELINE

Join us! iūnete!

@frackouttabk @bvillegreen  
@nonbkpipeline

## What is the NBK pipeline?

Right now, National Grid is building a massive fracked gas pipeline in North Brooklyn. We don't need it, but it is their ploy to raise our gas bills.

## What is fracked gas?

Fracked gas, or as *National Grid* says "natural gas" to misrepresent it as clean, is extracted from the Earth by drilling

with poisonous chemicals. NY banned fracking for gas in 2014 because it was proven to contaminate water and air and kill wildlife but we still import fracked gas from states like Pennsylvania.

## Where is the pipeline?

- Phase 1 starts in Brownsville
- Phases 2,3,4 snakes north through Bed Stuy and Bushwick
- Phase 5 Williamsburg to Greenpoint **if completed**.

## Why do we oppose?

1. Fracked gas fuels the **Climate Crisis**.
2. It's **RACIST!** They planned it across Black and Brown communities, and did not bother to get consent.
3. It's **hypocritical**. NYS banned fracking. So why do we build fracking infrastructure?
4. It's **dangerous**. Risks of explosions and ruptures
5. National Grid is a bad player:  
*Not transparent • Has over 1,600 safety violations • Puts profit over people*
6. We want renewables and a say in our energy system.  
*Our money, our community, our choice!*

How can I help fight this?
