

## Press Release

Brussels, 12 October 2021

### ChargeUp Europe welcomes Shell as its latest member

ChargeUp Europe, the voice of the EV charging infrastructure industry in Europe, is extremely happy to announce its latest member, Shell, who's membership reflects the company's strong commitment to electro-mobility, and its support for the foundational values and objectives of ChargeUp Europe.

Since its launch last year, ChargeUp Europe has now grown to 19 full industry members, two knowledge partners, and three ecosystem partners, all working together to accelerate the rollout of EV charging infrastructure and enable seamless charging for drivers across the EU.

Shell has announced it aims to grow its global network of operated electric vehicle charging points from around 80,000 points today to 500,000 in 2025, as part of the company's strategy to become a net zero emissions energy company by 2050, in step with society. In Europe, the company currently offers access to over 250,000 public charge points through NewMotion, a Shell group company.

**Commenting on the announcement, Roger Hunter, Vice President, Electric Mobility, Shell, stated:**

*"We are excited to be joining ChargeUp Europe, an association that is aligned with our priorities for investing in EV infrastructure to meet the charging needs of drivers at home, at work or on the go. We look forward to working with all ChargeUp Europe members towards an accelerated rollout of EV charging infrastructure and increased EV adoption in Europe."*

#### About ChargeUp Europe

ChargeUp Europe is the industry association for the electric vehicle (EV) charging infrastructure sector. Our association works to accelerate the switch to zero emission mobility and ensure that EV drivers can enjoy a seamless charging experience with access to high quality, readily available charging infrastructure across Europe. As of today, our 19 member companies are active in all 27 EU Member States, the UK and EFTA, with over 300,000 charging points in the EU.
