Introduction

M|R Walls is a cutting-edge design studio that specializes in developing and providing advanced covering solutions for the architecture and building industry. At M|R Walls, beauty and constructability converge to bring digital ideas into the built environment with intention and installation ease. Our surfaces feature nonrepetitive designs, and all seams are incorporated within the texture. We utilize our patented software and groundbreaking technology to create first-of-its-kind architectural solutions. Our surfaces are fully customizable. We work closely with architects and designers to ensure that design intent is met with visual impact and feasibility at the forefront. Renderings and large-scale mock-ups are available

PROJECT SHOWCASE

Jefferson Health

CLEAN, HYGIENIC,
& EASY TO INSTALL

M|R Walls Cloud design clads 17,000 sq ft of walls within the 12 floors of Jefferson Health's new building in Philadelphia, designed by Stantec.

The 3D Corian walls curve around each corner and extend the full length of each floor's hallways and elevator lobbies. The cloud design fosters a sense of community among all patients, doctors, and healthcare workers.

B. Cloud design to cover 17,000 sq ft of wall space along hallways

NE Texas Cancer Center

Corgan's design concept for this project aimed to create a brick-like pattern with pronounced dimensional contrast.

Our M|R Walls' interpretation of Figure B reinvigorated a frequently-used stone pattern, transforming it into a fresh and inspired take on a classic design. When combined with the advantages of Corian, this feature wall excels in both aesthetics and durability.

Reception

**BUILD
BRAND
IDENTITY**

Reception is the heart of any healthcare project. How can we craft a space that exudes warmth and promotes wellness?

Accent walls in reception areas enhance aesthetics, strengthen branding, and alleviate stress. They form welcoming and memorable spaces, projecting a sense of identity and comfort, which is vital for a positive experience for patients and visitors.

APPLICATIONS

Patient Rooms

Thoughtfully designed patient rooms can make patients feel at home, creating a comfortable environment to facilitate healing.

The M|R Walls design collection offers a seamless approach to introducing beauty into each room. The choice to incorporate illumination can enhance each room, providing full LED dimming control.

FACADES

M|R Walls embraces limitless possibilities for application.

From facades and ceilings to branding opportunities and reception desks, our products find their place in various settings. With cutting-edge installation systems, we offer solutions for all your needs. Enhance your project by seamlessly integrating and illuminating your company's logo, thereby amplifying your corporate identity.

CEILING

BRANDING

DESK

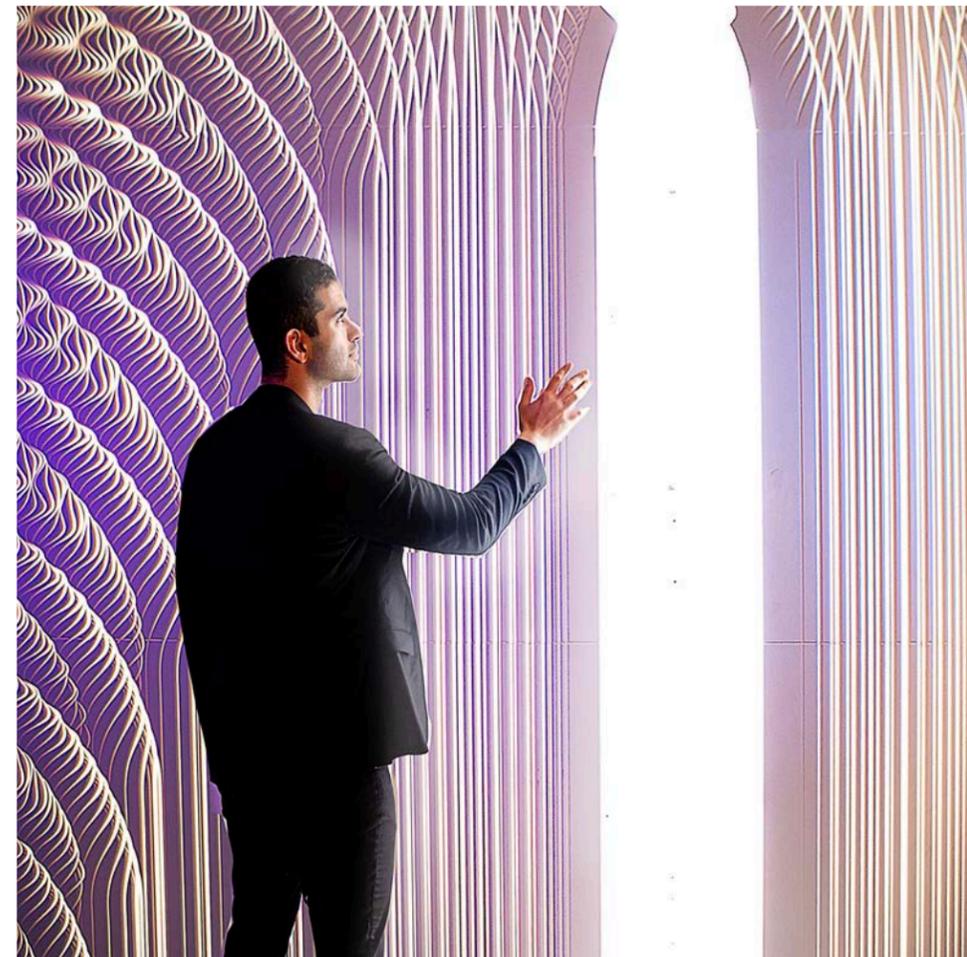

Spiritual spaces serve as sanctuaries of solace, strength, and hope. In such spaces, design becomes a vital partner in the journey toward physical, emotional, and spiritual healing.

Illumination and texture combine visual aesthetics with a sense of tranquility. The soft lighting and textured design create a calming atmosphere, promoting a peaceful and introspective environment.

Discover Calmness

CREATE SPIRITUAL SPACES

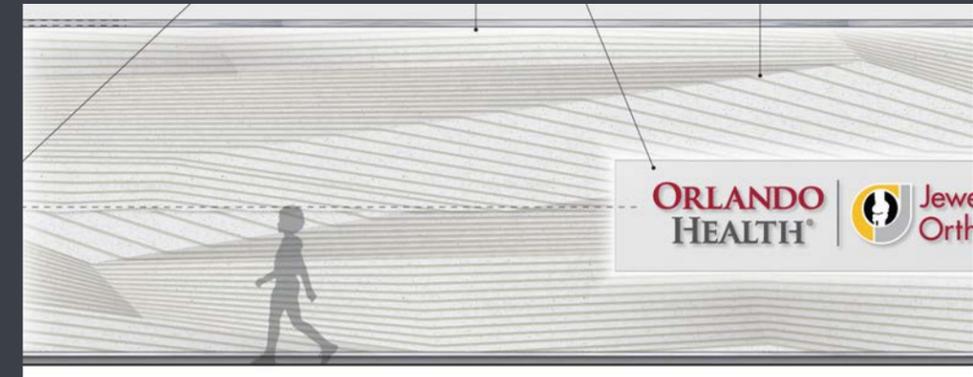

Customize

The Design Development program ensures a seamless transition from concept to reality.

Designers can provide artwork or inspiration images for transformation into a production-ready design, prioritizing beauty, feasibility, and logical installation. We offer multiple iterations, along with design team reviews, concept renders, drawings, and mock-ups.

CUSTOMIZE AT THE SPEED OF LIGHT

Benefits of Corian

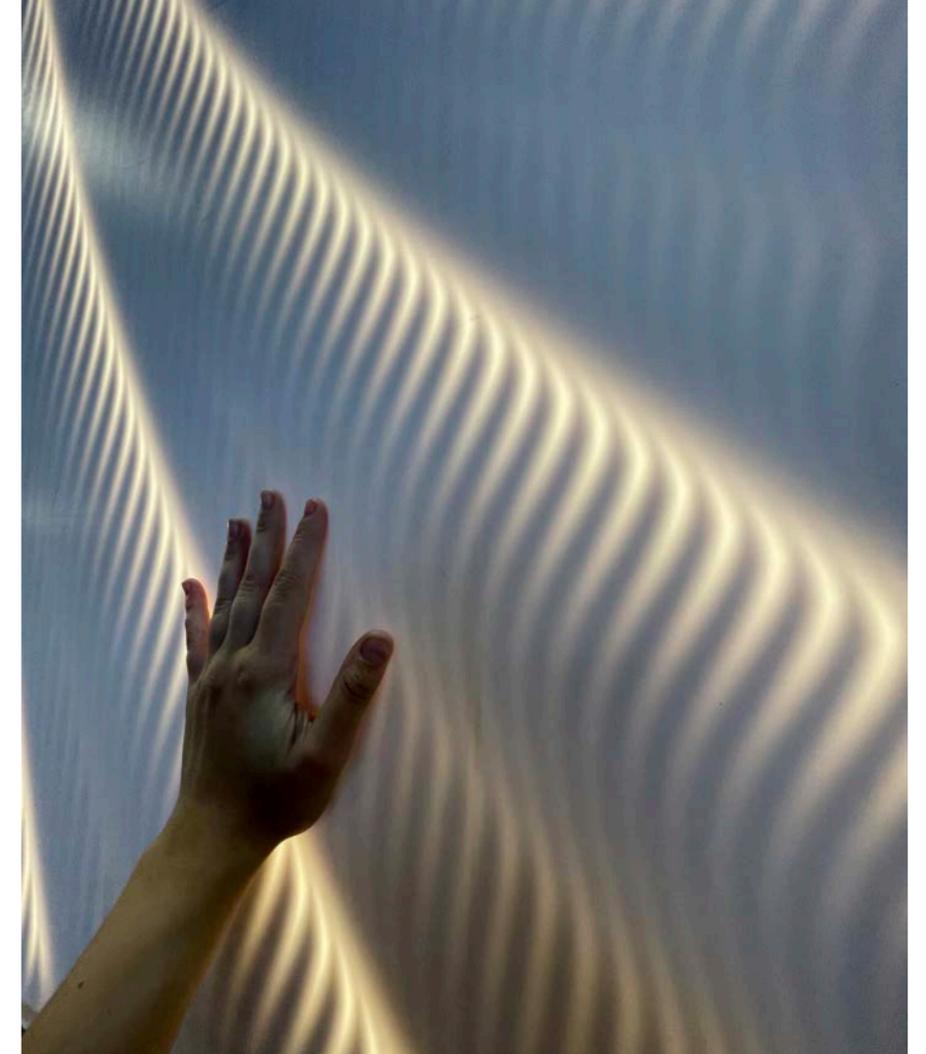

TRUSTED MATERIAL,
HIGH IMPACT DESIGN

Corian Solid Surface provides a durable, hygienic, and versatile material that is easy to clean, stain-resistant, and seamlessly adaptable to a wide array of applications.

Key material characteristics include:

- Grout-free
- Fire-rated
- Waterproof
- Low VOC, UL Greenguard Gold Certified
- Nonporous
- Puzzle Install technology
- Stain-resistant
- Custom Install Documents
- UV Rated
- Compatible with woodworking tools

Shine through Smooth Surfaces

M|R Walls aimed to craft a healthcare-centric design solution. By engraving texture onto the back face of the Corian sheet, the front surface remains sleek and flat. This design is visible through backlighting while retaining a smooth, easy-to-clean exterior, striking a harmonious balance between aesthetics and hygiene.

Both our textured and untextured surfaces are easily cleaned with everyday cleaners and even abrasive options such as isopropyl alcohol or acetone. The enduring and sturdy qualities of Corian Solid Surface make it an ideal choice for enhancing the beauty of healthcare spaces.
