### BESPOKE 3D TEXTURED SURFACES & SOLUTIONS DESIGN MEETS DURABILITY

HIGH-TOUCH DESIGN FOR HIGH TRAFFIC & HYGIENIC SPACES PATENTED SOLUTION USING CNC TECHNOLOGY

# Discover our MIR Products

### M|R Wall

Stunning high-touch design walls that are infinitely customizable and perfect for high-traffic areas and hygienic spaces. The design will never repeat itself at any scale and all seams are concealed within the texture, the magic of our patent.

## M|R Branding

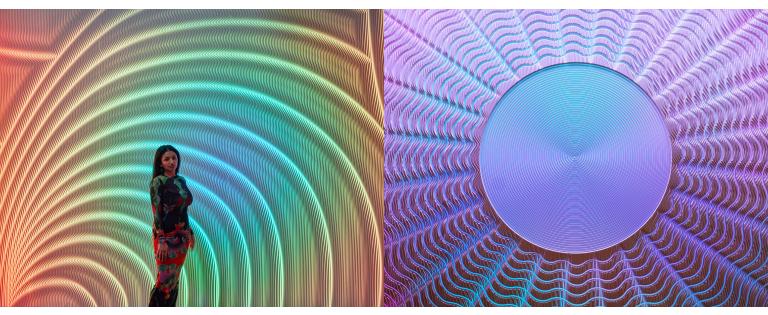

Showcase your company identity or building signage. Option for M|R to engrave your logo into the surface or we can coordinate with the project's signage team to be mounted on top of a corresponding design to the project's theme.

# Non-repetitive designs, infinite scale, bespoke.

### M|R Backlight

Elevate any MIR product with a turn-key, low-voltage backlight system. With dimmable, full-spectrum RGB LED lighting, this enhancement amplifies the dimensionality and visual impact of the design in all environments.

### MIR Programmable

Upgrade your MIR Backlight with animated lighting scenes. This system provides dynamic effects and vibrant colors, creating an engaging visual experience. Standard or custom animations are available as well as Pantone color matching.

# Discover our MIR Products

### M|R Ribs

Undulating parametric Ribs create dramatic depth for walls and can be elevated with texture and curvature. This product is fully customizable and a strong solution for wall and ceiling applications with the option to add integrating lighting.

## M|R Curve

Corian's thermoforming ability, with a 3-inch minimum radius, is a beautiful addition to any M|R product. Curvature can be used for a subtle appearance or a striking effect. Ideal for feature walls, softened inside corners, and desks.

# Non-repetitive designs, infinite scale, bespoke.

### M|R Exterior

Durable, UV-rated, hurricane-rated exterior solutions that account for all climate conditions and expansion. Our low maintenance surfaces have custom attachment strategies for all applications including facades, water features and sculptures.

### M|R Fins

Our lapped facade method offers extra dimensionality while ensuring a straightforward, hassle-free installation. This system can be seamlessly integrated with any standard design or custom texture, and can even include backlighting.

# **Case Studies**

## LAX, American Airlines

**PGAL** approached us with an ambitious project: designing a grand feature wall for the Los Angeles International Airport renovation. Inspired by California's natural sand dunes, the aim was to create a welcoming experience for arriving travelers. Spanning five key locations throughout the terminal, this architectural focal point merges high design impact with the durability required for high-traffic aviation spaces. Our patented software played a crucial role, allowing the design to scale without repetition or visible seams. Brought to life efficiently and installed by ISEC in under two weeks, the result is a perfect blend of digital artistry, structural safety, and practical constructability."

# Jefferson Health

Partnering with **Stantec** and **Ennead Architects**, MIR Walls line the hallways and elevator lobbies of Jefferson's Honickman Center in Philadelphia. The cloud design, spanning 17,000 sq ft of surfaces, was chosen to bring a calming, wellness energy to the space. The tactile pattern helps reduce sensory stimulation for patients, with seamless carvings and curved panels that flow smoothly around corners. By integrating our seamless, high-touch surfaces, we've aimed to not only enhance the building's visual appeal but also to contribute to a more comforting and supportive atmosphere.

# Corian© Solid Surface

Durability material for innovative designs on surfaces that last a lifetime.

### SEAMLESS

Inconspicuous seams can be achieved with Color-coordinated Joint Adhesive.

Always looks good as new and survives the impact of nicks and cuts from daily wear and tear.

Dirt or stains can't penetrate the surface and are easily removed with household cleaners.

#### (((•))) DAMPENS SOUND

Contributes to absorbing sound even in rooms full of people.

The smooth surface is highly hygienic thus bacteria and mold have nowhere to grow.

### TRUSTWORTHY

Product warranty is standard for all Corian® products and ensures that they will be free of manufacturing defects for a period of 10 years after purchase.

# Aesthetically pleasing, environmentally friendly

Corian's three-pronged approach to innovative and sustainable materials:

#### ENABLING CIRCULARITY

Select Corian<sup>®</sup> Solid Surface colors contain at least 6% and as much as 14% recycled material and are certified by Scientific Certification Systems (SCS).

👿 тоидн

penetrate.

Remarkably strong, doesn't

delaminate and fluids cannot

REPAIRABLE

repairable on-site to return them

Surfaces are renewable and

to mint condition.

#### PROMOTING TRANSPARENCY

Corian® Design materials are NSF certified, UL certified as mold resistant, do not contain bisphenol A (BPA), and certified for environmental performance: GREENGUARD Gold, National Green Building Standard<sup>™</sup> (NGBS) Green Certified<sup>™</sup>, and Living Building Challenge (LBC) Red List Free.

### REDUCING IMPACT

Innovation expertise is used to reduce the environmental impact of its products and operations, for example:

- Suppliers and raw materials are chosen responsibly. Pigments are free of heavy metals and toxins.
- Pre-consumer waste in manufacturing is reduced and recycled into new products, eliminating it going to landfill since 2011.

- 100% of the electricity used to make our products in North America comes from renewable energy sources.

# How to Spec in simple steps

### - MARIO ROMANO WALLS / MR WALLS

- **DESIGN**: Select from Standard Line or specify custom.
- **BACKLIGHT:** Specify if applicable.
- COLOR: Specify color.
- CONTACT: MIR Walls rep info

#### Custom Spec Example:

SOLID SURFACE WALL PANELS		
SSWP-1	MARIO ROMANO WALLS	CUSTOM PATTERN - OCEAN, COLOR DEEP TITANIUM
SSWP-2	MARIO ROMANO WALLS	CUSTOM PATTERN - MOUNTAIN - COLOR DEEP TITANIUM

## Basic info:

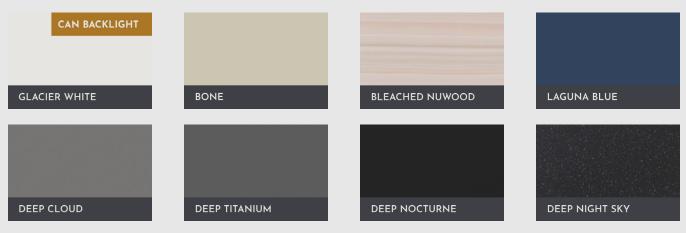

#### LEAD TIMES

Standard lead times are **6-8 weeks** from Shop Drawing approval to delivery. Increased lead times for thermoformed projects and volume orders.

#### **BACKLIGHT OPTIONS**

Backlight systems can be: **standard**, **waterproof**, **and programmable**. All LED and power supplies are provided in M|R Walls turnkey solution. Programmable includes 5 standard animated scenes (custom scenes are available).

### COLOR OPTIONS

- \* Corian Colors have natural, nominal color variations between sheets.
- \* Other Corian colors can be used for M|R Walls projects but may require a physical mock-up with order.

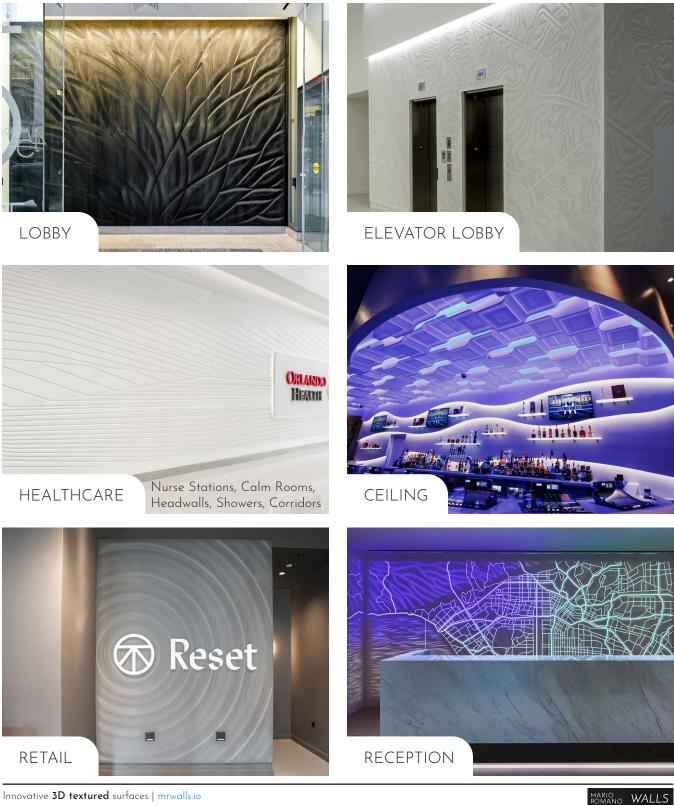

Reach out to M|R Walls rep for assistance with technical details.

3.5 lbs per square foot.

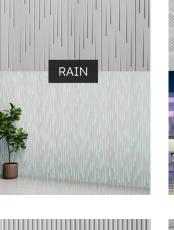

# **Popular Applications**

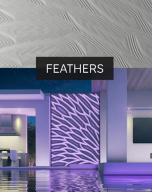

Indoors, outdoors. Highly hygienic, high-traffic areas. Wherever you need MIR Surfaces, we can go there.

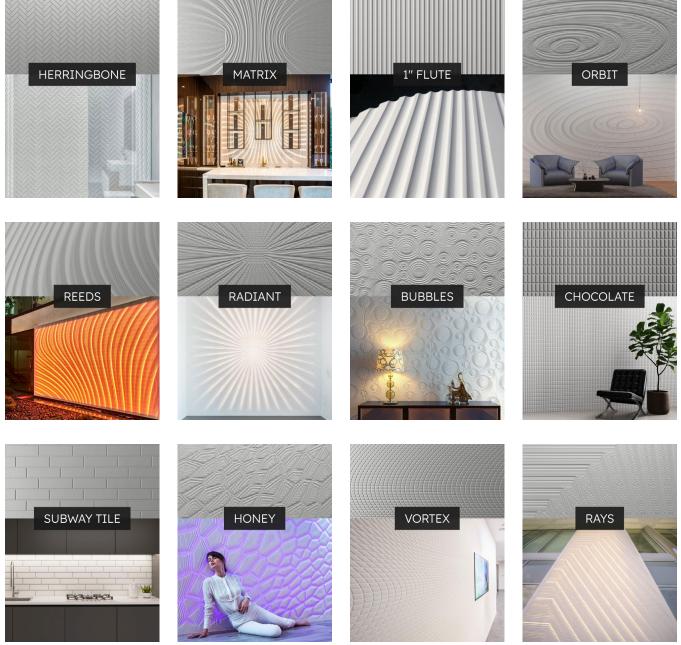

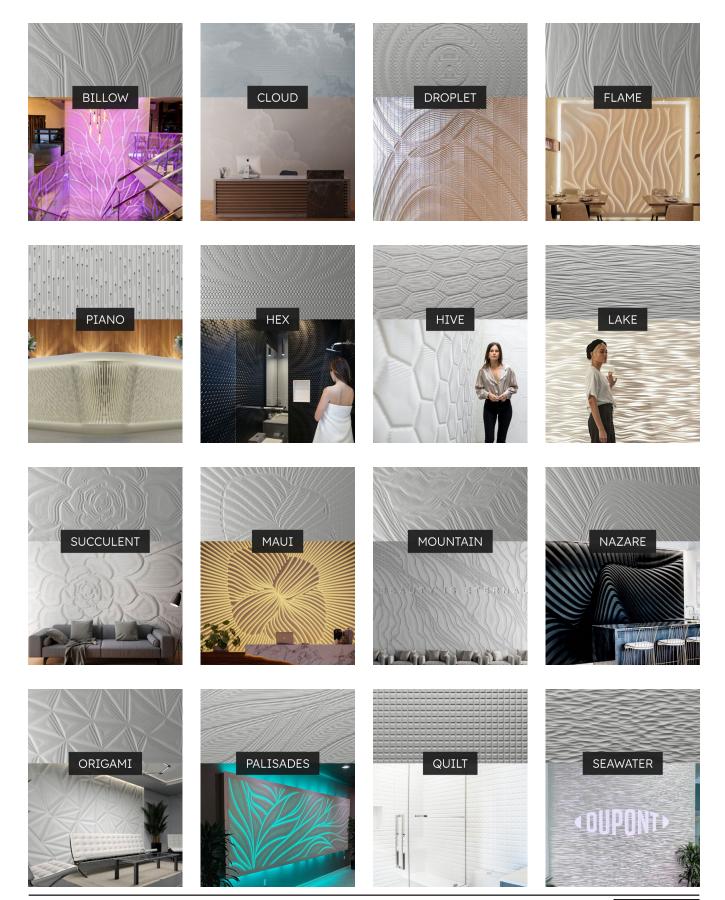

# Standard Line

Designs for every style and mood. Our extended collection comprises designs ranging from geometric, organic, linear, and biophilic. All designs can be cast into any size surface with the push of a button.

# **Customization Options**

Custom made easy. Provide us with inspiration and our design team will do the heavy lifting.

### CUSTOM TEXTURE

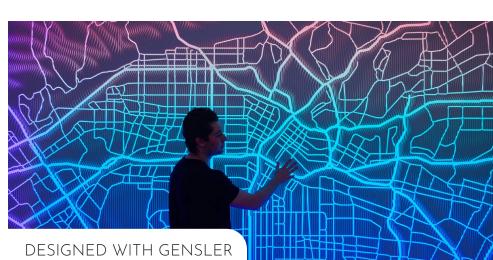

Our team collaborates with you to achieve your design intent, offering a hassle free creative process. Inspiration can be provided in the form of imagery, vector line work, or even a conceptual idea. We will create production-ready models and renders, iterating based on your feedback until the final design is perfect. Samples and large-scale mock-ups are available as well.

Integrate company branding and building signage into our surfaces. Complex logo engraving seamlessly connects feature walls to the buildings design. Pair this with a standard design or create a custom texture that aligns with the project theme. Exclusive company textures can be applied in multiple locations becoming a key element of the brand's identity.

#### CUSTOM PRODUCT

Our team will leverage our expertise to craft innovative solutions to bring abstract ideas to life. After reviewing your goals, we can model complex objects and develop a detailed manufacturing and installation plan, focusing on feasibility, optimization, aesthetics, attachment methods, and durable long-term longevity.

# Design Development Examples

### CONCEPT

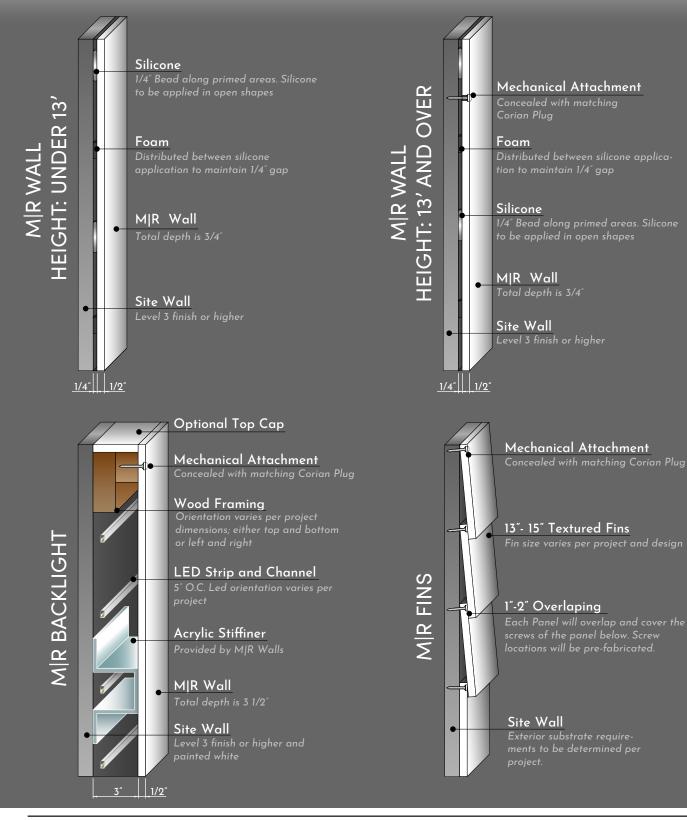

render

RESULT

# **Standard Installation Details**

### MR PATENTED PUZZLING TECHNOLOGY

Unique puzzle pieces fit together on the groove to conceal all seams and achieve large-scale no repetitive designs.

#### BACKLIGHT IN PROGRESS INSTALL

Install ready for puzzle piece #2 showcasing behind the scenes of LED strips, custom acrylic standoffs and framing.

PROGRAMMED DETAILS For fixtures, outlets, and openings.

Option A: Programmed with flat border and texture fade. Option B: Cutting in field with Standard Wood Tools. Best for minimizing work in the field.

### CORNER CONDITIONS

Texture fades to a flat border for a clean butt joint corner finish with Corian color-matching adhesive.

Best for flexibility and tolerance in the field.

### EXTERIOR CONDITIONS

Heat expansion gaps are integrated into all exterior projects specific to each site's climate requirements.
