ELEMENTS of a Clinical Trial Protocol

TABLE OF CONTENTS

1. BACKGROUND (Include Study Rationale and Hypothesis)
2. OBJECTIVES
   2.1 Primary Objective
   2.2 Secondary Objectives (if any)
   2.3 Exploratory Objectives (if any)
3. STUDY DESIGN
   3.1 Description of Study
   3.2 Rationale for Study Design
   3.3 Outcome Measures
   3.4 Expected Accrual
4. ON-STUDY GUIDELINES AND SAFETY PLAN
5. ELIGIBILITY CRITERIA
   5.1 Disease Characteristics
   5.2 Patient Characteristics
6. TREATMENT PLAN
   6.1 Design
   6.2 Treatment Delivery
7. TOXICITY MANAGEMENT
   7.1 Toxicity Classification
   7.2 Toxicity Management
8. REQUIRED CLINICAL AND LABORATORY EVALUATIONS
9. CRITERIA FOR RESPONSE AND PROGRESSION
   9.1 Definitions
   9.2 Methods of Measurement
   9.3 Evaluation of Response
   9.4 Patient Reported Outcomes/Quality of Life
10. SUBJECT DISCONTINUATION
11. STUDY DISCONTINUATION
12. STATISTICAL METHODS
13. ADVERSE EVENT ANALYSIS, DEFINITION AND REPORTING
14. PRINCIPAL INVESTIGATOR SAE REPORTING REQUIREMENTS
   14.1 Expedited Reporting of Unexpected SAES
   14.2 Duration of Reporting SAES
15. SAFETY REPORTING AND MONITORING (DSMP)
16. RETENTION OF RECORDS
17. RESEARCH ETHICS AND HUMAN SUBJECT PROTECTION
   17.1 Subject Selection
   17.2 Informed Consent Process
   17.3 Confidentiality
   17.4 Patient’s Rights
18. EXPLORATORY STUDIES
   18.1 Patient Reported Outcomes (PROs)
   18.2 Quality of Life
19. REFERENCES
