

# BLAIR WALSINGHAM

CANDIDATE,  
US CONGRESS,  
1ST DISTRICT  
TENNESSEE

## Blair Believes

*"We Tennesseans feel a strong connection to our mountains, lakes and rivers. As hunters, fishermen, and farmers, **our policies must reflect our values.**"*

## ENVIRONMENT Our Land, Our Future

## THE ISSUES:

- A report by UT shows that nearly 30% of our streams are so polluted that fish and other aquatic wildlife are in jeopardy.
- Almost 40% are not fit for human recreation.
- To preserve the environment that we love, we must pursue responsible & smart economic development policies. Let's protect our resources, our health and our lifestyle.

## Blair will:

### • Protect Public Land and Water

Our land and our water belong to us, and if we relinquish our right to safeguard and preserve those resources, we must consider what we gain by such an exchange. Once we give up our resources, we can never get them back.

### • End Plastic Pollution

We can end our dependence on tons of plastic by replacing it with hemp textiles. By creating more avenues for production of hemp, we can also produce products that are renewable, sustainable, economical, environmentally friendly and practical!

### • Sustainable Energy Production

We cannot allow our apprehension to impede progress. In this economy, we have an opportunity to use public works projects to enhance employment in renewable energy industries and tie economic regrowth to climate friendly jobs.
